# ANNUAL REPORT OF THE UNIVERSITY LIBRARY FOR THE FISCAL YEAR 1963-64

August 1, 1964

*To the Chancellor of the University:*

It is with mingled pleasure and regret that I submit this report of the University Librarian for the year ending June 30, 1964. The source of my pleasure is the variety and range of progress in our libraries I have to report. My regret derives from the awareness that from this time on your reading of our annual reporting will be as a concerned member of the Faculty rather than as the administrative officer responsible for our proper development. My regret is tempered somewhat by the joy we all have that you remain with us among the Faculty, from whom we continue to receive useful and wise counsel.

A few months ago the University Library published a seven-year summary review of the Library's growth. Our statistical reporting of this year will represent the climax of a hitherto unparalleled period of expansion in all areas of the Library. These two reports, taken together, stand as a permanent and fitting tribute to seven good years of solid building under your enlightened administration. I am certain that in submitting this report these remarks may be represented as recording the sentiments of the Faculty and the student body as well as the Library Staff, all of whom have benefitted equally throughout this period.

The collections of the University Libraries now comprise a total of 1,437,044 volumes. Included in this number are 202,151 items in the form of microprints, microcards and microfilm. We are now rapidly nearing an annual increase of 100,000 volumes, and we are not far from the mark of one and a half million volumes. In view of the volume count of seven years ago, 898,000, these figures indicate an increase of approximately 60 per cent in size in the seven year period. Some specific details of growth in recent years are recorded in the series of tables at the end of this report.

In this year we may rightfully and proudly direct some attention to the cumulative effect of seven years of determined efforts to extend the research quality of the Library's collections. Each of these years we have dedicated a sizeable sum to the purposes of a select committee of the Administrative Board responsible for winnowing the Research Fund requests of the entire faculty. Items desired may be proposed in any subject area and

8/26/77

## UNIVERSITY OF NORTH CAROLINA LIBRARIES

by any member of the faculty. A later section of this report, listing items acquired in the past year, will serve as a representative illustration of the type of material acquired. Sums totalling more than \$200,000 have been allocated during the past seven years to this use, and more than 640 items have been added to our libraries. The Committee has attempted to achieve an equitable distribution to all subject fields and many important research titles now grace our shelves.

In the area of collection building the quality of our increase is also significant. A few items may be noted as representative. This year our library was nominated, and accepted the national responsibility for serving as the Regional Depository for Federal documents, a designation accorded us through the good offices of Senator B. Everett Jordan. Through other sources we acquired a rare set of the original proceedings and exhibits of the Japanese War Crimes Trials. Another notable collection of records is found in the just completed microfilming of the early census records of agriculture in the Southern States. This project, funded by the National Science Foundation, has enabled us to bring together in durable form a regional group of records of great value to research in economics and history, never before really accessible.

Certain changes in the pattern of use clearly indicate to us the steadily improving character of our collections. We can and do watch for the areas in which our collections do not seem to meet the needs of our users. There are now fewer complaints and more expressions of satisfaction with the Library's material resources. We study the records of Interlibrary Loan for other evidence of the adequacy of our collections. In the present year we observe two diverse trends. The first is increased usefulness of our collections, not only to local users, but also to the numerous smaller academic and public libraries of our State and others. We see this in the increase of books lent to other libraries, an increase of 23% just in the past year. Another index is the proportion of books lent to books borrowed. We now lend nearly three times as many books as we borrow. It is obvious that our collections are improving and serving well.

Another factor which affects our estimates of use is the high rate of growth in photocopying from the Library's resources. We now keep three Xerox machines busy, and together with other types of copying equipment the photographic laboratory has reported an overall increase of 10% in volume of copy production. A part of this copy work represents copying as a substitute for interlibrary lending of the books themselves, thus

## UNIVERSITY OF NORTH CAROLINA LIBRARIES

enabling us to retain our materials for use here while still serving others. This is a rapidly growing practice in all large research libraries today.

In another area, special funding for swiftly building up the collection of books and journals to serve the new Undergraduate Library has given great impetus to this work. Almost a hundred members of the faculty have joined various members of the Library staff in the process of selecting the most appropriate representation of all of the fields of learning. The basic collection already in use in our present Undergraduate space numbers nearly 30,000 volumes. With all of the selection now virtually completed and many volumes already acquired or on order, we expect to have a collection of approximately 45,000 volumes ready to move into the new building when it is completed.

This year has been notable for critical changes and increase in library personnel. With the considerable increases in funds for library materials, we have had to move up the operating levels of both acquisitions and cataloging to higher plateaus. We had at the same time to replace the Head of Acquisitions and find a suitable successor to our Head of Cataloging, whose retirement is imminent. Despite a national shortage of qualified personnel, our increasingly bright image in the library and academic world and the great promise of our future have enabled us to attract a number of highly qualified, able librarians to our staff. We note the appointment of Mr. Donald Axman, initially as Assistant Chief, Catalog Department, to become Chief on July 1, 1964. Mr. Axman comes to us with excellent academic qualifications and experience from Pennsylvania State University Library where he served in a comparable assignment. Miss Frances Yocom has agreed to continue on annual appointment as a principal cataloger. We are doubly blessed to have administrative functions taken over so smoothly and also to be able to retain her professional skill in our catalog department. We brought Dr. Richard Dougherty fresh from his academic program, but also possessing a varied experience in other academic libraries, as Head of the Acquisitions Department. These principals, together with a number of supporting personnel have led us to salutary revision of many parts of our processing procedures calculated to enable us to cope with the never-ending flood of new materials. Further improvement has been made in manning the outlying libraries, with each separate library now having fully professional direction. Our Library Assistantships, now numbering nineteen in all, bring us the brightest and ablest

## UNIVERSITY OF NORTH CAROLINA LIBRARIES

young Library School students for half-time assignments throughout the system. They are making an important contribution, and their fresh views often bring new light to old problems. Taken all together, my own impression is that of a vibrant, industrious, inventive, **and** swiftly developing group of librarians, supported by increasing numbers of bright young assistants; it is a whole staff rejoicing in hard work and proud of its contribution.

Noteworthy changes have taken place in the physical facilities of the University Libraries. With the completion of the first unit contract for air-conditioning the Wilson Library many of our public service areas were made infinitely more useful to summer students, and the stacks and the technical processing area became tenable. The assurance of funds and planning for cooling equipment to serve the whole building represents another step achieved in this fiscal year. We now have hope of seeing the work completed by the next summer season. Initial steps have been taken on the first floor of Wilson in anticipation of the change to first floor use for circulation and control. This work will continue until we move the Undergraduate Library to the new building.

The structural planning for the new Undergraduate Library has been completed, with interior design and equipment only remaining. The functions and capacities outlined in the Program to the architect have been admirably accomplished within funds and space available.

Modest gains have been made in funding the proposed Special Collections Library, with more than \$250,000 now in hand or committed. With the passage of legislation authorizing matching funds for academic libraries and our own efforts for partial funding by the State, we have hope of seeing this much-needed building soon on the way.

Two departmental libraries occupied quarters this year in newly constructed buildings, namely Botany and Geology. The Health Affairs Library once more staved off suffocation by book-stock through the generous availability of storage space in the new Public Health building. We are planning to develop a comprehensive revision of our 1970 projection to take into account new concepts of service and organization of collections derived from recent developments. Many institutions like ours in other parts of the country are feeling the pressures of expansion and we should thoughtfully assess the experience of others for its usefulness to our own problems.

We remain uncommitted in at least one area of potential

## UNIVERSITY OF NORTH CAROLINA LIBRARIES

change. This year has seen the usual publication of thousands of words on the subjects of automation and information retrieval. Members of the staff are attentive to all of this, but we have not yet found any economically sound application to our needs, apart from the new developments in photocopying earlier mentioned.

In another field, following the initiative of the University itself in the inauguration and strengthening of certain area studies, the Library has made important progress in developing its collections for research in the East European area, in the Far East, particularly China, and in Latin America. We have plans to provide more specialized bibliographical competence to these areas in the coming year through the assignment of particularly qualified personnel to each area, under the direction of the Chief Bibliographer.

These brief extracts from the record of the Library's year may convey an impression of satisfaction and tranquil acceptance. These are within us, but there is far more. There is a ferment of eagerness in the faculty, having tasted the long-sought manna of ampler book funds; there is an excitement in the staff, now vitalized by a strong injection of new methodology and improved support personnel; there is mounting evidence of ever heavier library use, resulting from the well-known competition of numbers and improved physical facilities; and finally, there is anticipation, for all of us, but most clearly in the eyes of those who were literally stopped in their tracks by the scale model of our future facilities the first day it stood in Wilson Library's main foyer.

In the face of these and many more impressions, this Librarian stands grateful for the opportunity to live, work, and grow with the truly remarkable support and understanding this Library has received over the seven years of your Chancellorship. This period of the Library's life will stand out, in my judgment, as the time when the University of North Carolina Library came of age, to maturity. You have provided a base upon which any level of growth can be soundly planned.

We can both take pride in the certain knowledge of the massive personal resources without which any work of ours would be vain, the members of the Library staff, the Administrative Board of the Library, and the relatively unsung heroes of battles of the budget, your own administrative staff. For all of this we are grateful, and once more for the great satisfactions of the future, hard work and untroubled understanding.

JERROLD ORNE  
*University Librarian*

NOTABLE ACQUISITIONS  
OF  
THE YEAR

## NOTABLE ACQUISITIONS

A considerable number of those works which deserve to be listed as "notable acquisitions" have found their way, as might be expected, into the Library's Rare Book Room. Thus, three additions have been made to the Incunabula Collection during the past year. They are:

Aristoteles. *Interpretatio scholastica nove logice Aristote.* Cologne, Heinrich Quentell, 1499.

Hyginus, C. Julius. *Clarissimi uiri Iginij poeticon astronomicon.* Venice, Erhard Ratdolt, 1482.

Sulpitianus, Paulus Alexius. *De verborum copia et elegantia.* Rome, Silber, 1490. (No other copy known to exist in U.S. Libraries.)

Among the sixteenth and seventeenth century titles acquired in the course of the year are:

Ascham, Roger. *Disertissimi viri Rogeri Aschami . . .* London, pro Francisco Coldocko, 1581.

Delfino, Domenico. *Sommario di tutte le scientie.* Venice, Gabriel Giolito, 1556.

Bruni, Leonardo Retino. *La historia universale de suoi tempi.* Venice, Fran. Sansovino, 1561.

Boccaccio, Giovanni. *Laborinto d'amore.* Venice, Nicolini de Sabio, 1536.

Rivadeneira, Pedro de. *Vita del P. Ignatio Loiola.* (Translated from the original Spanish into Italian.) Venice, I. Giolito, 1586.

Daniel, Samuel. *The collection of the history of England.* London, F. Leach, 1685.

Dryden, John. *The kind keeper.* London, Bentley & Magnes, 1680.

Shirley, James. *The bird in a cage.* London, Alsop & Fawcet, 1633.

Suckling, John. *Fragmenta aurea.* London, Humphrey Moseley, 1648.

Herbert, George. *The temple.* London, W. Godbid, 1674.

Twysden, Sir Roger. *An historical vindication of the Church of England in point of schism.* London, Robert Pawlet, 1675.

The eighteenth century is represented by an early edition of *Gulliver's travels* by Jonathan Swift. London, 1726; a first English edition of *Persian letters* by Montesquieu, London, 1722; *The temple of fame, a vision* by Alexander Pope. London, 1715; the first edition of *The rivals* by Richard Sheridan. London, 1775; and the first edition of *The federalist, a collection of essays* by Alexander Hamilton, John Jay and James Madison. New York, 1788.

Our outstanding acquisition for the nineteenth century is a first edition of Shelley's *Prometheus unbound*, London, 1820. Among other additions from this century are first editions of *Poems* by Alfred Tennyson. London, 1833; *Salmagundi* by Wash-

ington Irving (in the original 20 parts) New York, 1808; *Twice told tales* by Nathaniel Hawthorne. Boston, 1837; *Our old home* by Nathaniel Hawthorne. London, 1863; *An historical discourse delivered before the citizens of Concord, 12th September, 1835*, by Ralph Waldo Emerson. Concord, 1835; *A history of New York by Diedrich Knickerbocker* [Washington Irving], New York, 1809; and *The political economy of art* by John Ruskin. London, 1857; and Henry James' *The portrait of a lady*. Boston, 1882; *Daisy Miller, a comedy in three acts*. Boston, 1883; and *In the cage*. Chicago, 1898.

Our twentieth century collection of American and English authors continues to grow with important additions to our holdings of William Faulkner, Robert Frost, Ernest Hemingway, Sinclair Lewis, John Steinbeck, T. S. Eliot, John Masefield, Dylan Thomas, John Galsworthy, and James Joyce. Among the Joyce titles recently secured is the beautiful Bodley Head edition of *Ulysses*, London, 1936. This was limited to 1,000 copies of which 100 were signed by the author. Our copy is no. 14.

Whereas most of the above mentioned titles were obtained with funds provided by the Whitaker bequest, other noteworthy acquisitions, 126 in all, were selected and added to our collections through the Research Fund Committee. In the following list, the attempt has been made to single out the items of greatest research value in the different subject areas concerned.

#### ART

- Barcelona. Junta de Museus. *Butlletí del Museus d'Art*. Barcelona, 1931-37. 15 vols.
- Braque, Georges. *Catalogue de l'oeuvre de Georges Braque*. Paris, 1959-1963. 5 vols.
- Gualandi, Michelangelo, ed. *Memorie originali italiane riguardanti le belle arti*. Bologna, 1840-45. 6 vols. (in 2)
- Houbraken, Arnold. *De groote schouburgh der nederlantsche konstschilders*. The Hague, 1753. 3 vols.
- Répertoire d'art et d'archéologie*. Paris, 1926-59. v. 31-63.
- Rijksbureau voor kunsthistorische documentatie. *Decimal index to the art of the Low Countries*. The Hague, 1963. ser. 1-16.
- Rubens, (Sir) Peter Paul. *Correspondance et documents épistolaires*. Antwerp, 1887-1909. 6 vols.
- Wilpert, Josef. *I sarcofagi cristiani antichi*. Rome, 1929-36. 3 vols. (in 5)

#### BOTANY

- Baerner, Johannes. *Die Nutzhölzer der Welt*. (Hamburg, 1943-44). New York reprint, 1963. 3 vols. and index.
- Oesterreichische botanische Zeitschrift*. Vienna, 1854-1952. 17 vols. (towards completion of UNCL holdings)

## UNIVERSITY OF NORTH CAROLINA LIBRARIES

*Symbolae Antillanae seu fundamenta florae Indiae Occidentalis*  
(ed. Ignaz Urban). Berlin, 1898-1928. 9 vols. (1964 repr.)

*University Librarian*

CHAPEL HILL, NORTH CAROLINA  
AUGUST, 1965

# ANNUAL REPORT OF THE UNIVERSITY LIBRARY FOR THE FISCAL YEAR 1964-65

August 1, 1965

*To the Chancellor of the University:*

In the absence of the University Librarian, Dr. Jerrold Orne, I submit this report of the University Library for the year ending June 30, 1965. Dr. Orne is on a three-month assignment in Viet Nam to advise on the development of that country's library services and resources. His selection for such work signifies his international prestige in the field of library administration and planning, and brings great honor to the UNC Library.

## *Library Resources*

The strength of a research library is partially represented by numeric data, and your attention is therefore invited to detailed tables at the end of this report. To summarize a few of the more important data, it may be noted that the collections of the University Library now total 1,533,083 volumes, 14% of which are in microtext. The total count registers an increase of 96,039 volumes since June 30, 1964. A gratifying increase in funding can also be reported, with expenditures of \$1,513,317.00 representing an increase of \$169,064.00 over the previous year. These figures give evidence of the magnitude and cost of the University Library, which is now the third largest academic library in the south and twenty-second largest in the nation.

While accumulated library resources represent the devotion and support of countless friends of the University over many years, it is the acquisitions record of the past twelve months (96,039 volumes) which measures current vitality. Furthermore, it is the *quality* of the year's acquisitions which largely determines whether or not the Library is making its maximum contribution to the University's teaching-research program. It is difficult to measure quality, but it is possible to select two procedures which exemplify our attempts at quality control. One of these procedures is on the teaching level and one is on the research level.

The Undergraduate Library, being solely concerned with supporting the University's teaching function, is ideally suited to a consideration of book selection in this area. 10,565 volumes were added to the Undergraduate Library during the year. Eighty-eight faculty and staff members are known to have contributed to selecting these volumes. The initial goal of selection is to gather together the 50,000 best books for shelving in the Robert B. House Undergraduate Library. The "best" books are taken to be those which are selected by specialists for their in-

## UNIVERSITY OF NORTH CAROLINA LIBRARY

trinsic value *and* which are actually used by undergraduates. The degree to which such books are used is therefore believed to be a measure of the support which the Library gives to the University's teaching function. The 41,974 volumes so far selected for the Undergraduate Library's General Collection (as distinguished from its Reserve Reading Collection) were used 1.4 mean number of times during the year. For comparison, means of .5 and .8 were reported in 1963-64 for two well-known undergraduate libraries in northeastern universities. It is good to report that the trend continues upward in the use of books in the UNC Undergraduate Library, and at least 81% of the readers in that Library are, in fact, undergraduate students. Clearly, the Undergraduate Library is a vital factor in the teaching function.

On the research level the quality of selection is not measurable in terms of use, but widespread faculty participation continues to give us the best guarantees of appropriate book collecting. The particular aspect of quality selecting presented here is the activity of the Research Fund Committee. Working with the sum of \$30,000.00, the Committee this year selected sixty items from among those recommended by faculty members at large. In its decisions, the Committee was guided by the intention to distribute its acquisitions equitably among the various academic fields represented in the University, according to the most convincingly demonstrated needs. The list of Research Fund Committee selections is presented later in this report; it is offered as sufficient evidence in itself of the attention to quality book selecting at the research level.

Two significant developments in the acquisitions of materials should be mentioned. The first is a new accent in this university library, as in many others, on the acquisition of materials on many or all subjects from certain geographic areas of the world. Thus the UNC Library has established special procedures for Far Eastern, Latin American, East European, and African materials, with persons added to the staff who are competent by language training for this work. A second development is the arrival on the book market of highly desirable but extremely expensive reproductions (by various new technical processes) of items long out of print. It becomes increasingly important that the utmost restraint and judiciousness be employed so as to select only those expensive items which deserve top priority to our needs in Chapel Hill.

In previous annual reports, interlibrary cooperation in acquisitions was stressed. This cooperation continues to flourish. It is a highly significant factor in increasing library resources in the Research Triangle area and throughout North Carolina. There can be no doubt that cooperative acquisitions programs will continue to be expanded, not only in the state but in the nation.

# UNIVERSITY OF NORTH CAROLINA LIBRARY

## *Operations*

The major organizational framework of the University Library remained unchanged. Technical processing departments witnessed numerous internal changes, however, due to the need for streamlining operations. A 24% increase in the number of new items to be processed allows one to trace a wave of increased work from the initial step of searching to the final delivery of materials to the shelves.

In the Acquisitions Department, two new procedures illustrate the search for greater efficiency. A new book ordering procedure involves xerographic reproduction of original order cards rather than the typing of multiform order slips. A study of this new procedure revealed a startling increased productive capacity and a cost reduction of 33%. A second new procedure is the integration of scattered serial records into a single record. Eventually this integrated record will be in a public service area directly accessible to all readers.

The cataloging operations were subjected to corresponding adjustments. An important decision was reached during the year after full consultation with faculty members concerned. The decision is to reclassify most *science* books on the campus in the Library of Congress classification. This will involve changing the call numbers of some 100,000 volumes from Dewey Decimal classifications to Library of Congress classifications. New science books will, of course, be classified by the Library of Congress scheme as they are initially processed. The principal purpose of this change is to enable the Catalog Department to utilize to the fullest the cataloging which is already done by the Library of Congress. The cataloging of science books through the use of Library of Congress cards absolutely unaltered will make such cataloging a clerical function. This will increase production, reduce costs, and free professional catalogers for more difficult tasks. The change to the Library of Congress classification for science books may also have implications for the future when science libraries throughout the nation are expected to be linked together by electronic devices for the exchange of information. In cataloging, the search goes on for less costly means of organizing library materials.

Interlibrary lending agreements with other North Carolina academic libraries have been significantly altered during the year. Particularly worthy of note are the expanded services made available to Charlotte College (now UNC at Charlotte) which give that developing institution as much support as possible. Telephone and teletype requests from the Charlotte campus are now accepted (only mailed requests are generally honored among libraries), free photocopy work is done in certain situations, personal requests from the Charlotte faculty are honored, and the limit on number of items lent to an individual is relaxed. As

## UNIVERSITY OF NORTH CAROLINA LIBRARY

the year drew to a close, negotiations among the libraries of the Consolidated University and Duke University looked forward to even greater mutual preferential treatment in lending, photocopying in lieu of lending, and sharing of resources. Mention should be made here of the publication of the *North Carolina Union List of Scientific Serials*, a work which lists scientific periodical holdings of libraries of the Consolidated University, of Duke University Library, and of the Chemstrand Research Center Library. Edited by Mr. I. T. Littleton, Acting Director of Libraries at North Carolina State University, the *Union List* was placed on magnetic tape so that future holdings can be merged by computer techniques. In this way, future editions can be produced without re-editing the entire list. It is believed that the *Union List* will be of enormous importance to the development of science in North Carolina, and particularly to scientific progress in the Research Triangle area. The UNC Library staff contributed hundreds of hours to the reporting of holdings in Chapel Hill libraries. Publication of the *Union List* was made possible by a generous grant from the North Carolina Board of Science and Technology.

In reviewing the operations of the reference and circulation units both within the Louis R. Wilson Library and in departmental collections, the most evident problem is the inadequacy of space. Original planning called for occupation of the Robert B. House Undergraduate Library in 1965, but a three-year delay now seems indicated. Completion of this building will of course immediately relieve a desperate shortage of space for undergraduate services, but it will also set off a series of spatial readjustments which will allow greater work areas for many library departments. It is hoped and expected that construction of the Robert B. House Undergraduate Library will begin soon. Planning for its interior layout, color schemes, and equipment was made possible during the year by a generous \$5,000.00 contribution from the Hanes Foundation of Winston-Salem. This latest gift from the Hanes Foundation was most welcome and appreciated. It may well be considered the only substantial indication of progress on the Undergraduate Library building.

The other new library building currently being planned, the Special Collections Building, was also moved a step forward. Mr. Frank H. Kenan, as trustee for Mrs. Sarah Graham Kenan, generously provided \$24,087.47 for equipping the Special Collections Building, and \$6,022.71 to provide income for the purchase of rare books. These contributions are heartening endorsements of the Library's long-range development plans.

Other important developments in the Library's day-to-day operations may be briefly stated. A Xerox Copyflo machine was installed by the Photographic Service to rapidly convert microfilm negatives to full-size paper copy. This equipment will also

## UNIVERSITY OF NORTH CAROLINA LIBRARY

be used to produce catalog cards, replace deteriorating books, and provide many other services not only to the Chapel Hill campus but to neighboring universities and colleges. The air-conditioning of the entire Louis R. Wilson Library was completed in April, much to the encouragement of research and study. Renovation of the Wilson Library has proceeded slowly, as new passages have been installed, necessary partitions put in place, a glass enclosure for the main entrance erected, and the Administrative Offices renovated. Looking to the extensive rearrangement of Wilson Library's work units when the new Undergraduate Library building is completed, sixty-eight new card catalog cases were received and placed in storage.

A final development during the year does, in fact, mark the end of an era. Administrative responsibility and control of the Bull's Head Book Shop was transferred from the University Librarian to the Manager of the University's Book Exchange. The inventory was valued at \$41,378.02, and satisfactory financial terms for these assets were settled. The Book Shop will continue to be located in the Wilson Library until such time as a new building to house all University book sales is completed.

### *Personnel*

Remarkably few changes took place in the staff during the year, which in itself makes it an unusual twelve-month period. Not a single department head position or other principal position changed, and only the retirement of Miss Frances L. Yocom—Chief of the Catalog Department until July, 1964—can be reported. During her last year of employment Miss Yocom served as a senior cataloger, giving the Library the benefit of her many years' experience. Other professional staff changes below the departmental chief level included the resignations of Mrs. Dorothy E. Brown as Chemistry Librarian, Mrs. Joan Durrance as Assistant Documents Librarian in Wilson Library, and Mrs. Olga C. Palotai as Librarian of the Institute of Government. New professionals welcomed to the staff were: Mr. Archie Fields, Cataloger, recent graduate of the School of Librarianship, University of Washington in Seattle; Mr. Nickey Achée, Geology Librarian, formerly Reference Librarian at Parsons College in Iowa; Mrs. Gay M. Hertzman, Art Librarian, formerly Librarian of the North Carolina Museum of Art in Raleigh; Miss Gillian Nicholson, Acquisitions Department, formerly Assistant Librarian at the University College of Rhodesia and Nyasaland; and Mrs. Mary Alice Kraehe, Acquisitions Department, formerly on the staff of the University of Kentucky Library.

A disproportionate number of professionals to subprofessionals on the University Library staff is gradually being corrected with each passing year. As of June 30, 1965, the salaried employees of the University Library numbered forty-seven pro-

## UNIVERSITY OF NORTH CAROLINA LIBRARY

professionals and sixty-four subprofessionals. These figures do not include staff members in the Division of Health Affairs Library, Law Library, or Institute of Government Library. In general, the staffing situation is quite good. An unusual local asset in personnel work is the number of wives who are professional librarians and who accompany their husbands to Chapel Hill for the husbands' graduate studies.

The chief difficulty in staffing continues to be that of finding persons with scientific training to man certain departmental libraries. To alleviate this shortage, the decision was made during the year to assign a professional librarian the responsibility for two science libraries and have in each of those two libraries a full-time subprofessional assistant. This system is undergoing a trial by grouping the Geology Library and Zoology Library under one professional, and the Chemistry Library and Mathematics-Physics Library under another professional.

### *Finances*

The vital category of "Books-Periodicals-Binding" showed almost a \$50,000 increase during the year: \$551,181 in 1963-64 and \$600,924 in 1964-65. This is gratifying progress as the UNC Library continues to improve its position relative to other university libraries. The policy of sustained accretions in book funds in the last decade has been the determining factor in re-establishing the UNC Library's proper growth pattern. Eighteen university libraries in the nation have larger book budgets, including two libraries in the southern states. Nevertheless, the UNC Library's position gradually improves and hopefully will continue to do so with consistent and prudent increases. It is worthy of note that there were actually decreases in the amounts spent for "Periodicals" and for "Binding," so all the increase and more (totaling approximately \$57,000) went into "Books."

The \$812,235 expenditures on "Salaries and Wages" is approximately 57% of the combined figure for salaries, wages, books, periodicals, and binding. This personnel/books ratio (roughly 6 to 4) is a generally accepted one in university librarianship. Other items in the table of expenditures reflect healthy growth and are believed to be self-explanatory.

The role of the University Library in fostering the University's teaching-research program is a challenging one. We on the library staff are privileged to have a part in this undertaking, and look forward to a year of continued service.

JOHN H. GRIBBIN

*Associate University Librarian*

NOTABLE ACQUISITIONS  
OF  
THE YEAR

## NOTABLE ACQUISITIONS

A rather detailed survey of notable acquisitions during the past year appeared as recently as June 1965 in *The Bookmark* (no. 35, p. 31-39), a publication of the Friends of the University of North Carolina Library. Reference is made to this survey instead of reprinting it here. A few additional gifts may be mentioned, however. These include: another incunabulum purchased with Whitaker funds, *Opera Latina* of Petrarch, published by Johann Amerbach at Basel in 1496; nineteen new titles published by the Limited Editions Club and presented by the late Dr. William P. Jacocks; important additions to the Henderson-Shaw Collection from the estate of Dr. Archibald Henderson; and a group of forty-two books and other materials by and about H. L. Mencken, presented by Mr. Frank Borden Hanes. The University Library continues to be enriched by these and other gifts from loyal and generous friends of the present and past.

The survey in *The Bookmark* emphasized gift acquisitions, so outstanding purchases made through the Research Fund with regular budget appropriations were largely excluded. In all, the Research Fund Committee selected sixty titles which were judged to be of outstanding research value; these titles are listed below.

### ART

ARTE ANTICA E MODERNA. Florence, 1958-63.

Filhol, Antoine Michel. GALERIE DU MUSÉE NAPOLEÓN. Paris, 1814-15. 10 vols.

# ANNUAL REPORT OF THE UNIVERSITY LIBRARY

## FOR THE FISCAL YEAR 1965-1966

August 1, 1966

*To the Chancellor of the University:*

It is with keen pleasure and appreciation that I submit this Annual Report of the University Librarian for the fiscal year 1965/66. My pleasure finds its source in the steady growth and solid development of the Library's resources, despite reduced funding for this purpose. My appreciation is due to the Administration's sympathetic and determined efforts to forward our work and to the valiant efforts of the library staff to cope with ever increasing numbers of materials and patrons.

Our statistics for 1965/66 record a total of 70,875 bound volumes and 19,099 microform volumes added to the University Libraries this year. This brings our total holdings to 1,623,057 volumes. A year ago we reported 1,533,083 volumes. This year's increase amounts to 89,974. Circulation figures presented in the tables reveal a 25% increase over 1964/65, continuing the trend to increased library use. The financial record of this year deserves attention, for in it one finds the unmistakable portents of a changing funding picture. State appropriated funds, though still greater than earlier years, are increasingly shored up by growing dependence upon federal funds and endowed resources. In fact, the University Library has not benefited proportionately from the enormous increases throughout the University in funds for research grants and contracts. This dissonance must be quickly remedied, or the Library will rapidly retrogress in its ability to provide the resources needed for these very critical programs in the University. We have proposed one basic plan for alleviating this problem; we hope to amplify our planning for a broader basis of support as rapidly as possible. Funds expended for library materials in 1965/66 amounted to \$581,824, as compared with \$600,942 in 1964/65. This modest decrease was possible only because of increased spending from trust funds, NDEA and other external sources. The state appropriated funds for materials were lower by \$23,874 for the year, due to the sizeable one-time appropriation of the previous biennium to build up the Undergraduate Library collection. Further, the major increases in state appropriations for this biennium were concentrated on staff improvement to enable us to just begin to cope with today's unprecedented boom in salaries for needed professional and other staff. That this increase was long overdue is evident from the example of our losses in this year alone.

Three principals on the staff either left during the year or gave notices of intention of leaving: Richard M. Dougherty, Chief of the Acquisitions Department, resigned to become Associate Librarian at the University of Colorado; William A. Pease,

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Undergraduate Librarian, is resigning to become Librarian at Franklin and Marshall College; and John H. Gribbin, Associate University Librarian, is resigning to become Library Director at Tulane University. Each of these three leaves Chapel Hill because of a happy concurrence of unusual opportunity elsewhere and a time for assuming greater professional responsibility. It is important in seeking replacements, however, to note that the three persons resigning are going to salaries which are 50%, 88%, and 42% higher than those salaries which they were receiving at UNC at the time they decided to leave. These percentages dramatically illustrate the competition which UNC Library faces in the professional market place. We are aware of the keen competition for prime faculty members in academic institutions today; we record these examples to demonstrate that the need for revision upwards of library salaries is no less than is now felt for faculty. We have been particularly fortunate until now in bringing in and holding able staff for a reasonable time. It is becoming increasingly difficult and far more costly to do this. This University, like all others, will have to devise means of meeting the problem or it will inevitably lose some of the stature it has acquired so arduously over so many decades.

This year, with the advice and counsel of the Faculties concerned and the Administrative Board of the Library, we initiated the conversion of the classification system in the several science libraries of the University. There are five of these, holding approximately 100,000 volumes. The first one, Math-Physics, will soon be completed. It is one of the largest. The decision to re-classify, converting from Dewey to the Library of Congress system, has very great significance for the University of North Carolina Library now and for the years ahead. Two major factors provided the essential basis for this decision. First, it is now increasingly obvious that the Dewey Decimal classification system is not suitable for the volatile and rapidly proliferating knowledge of our time, and second, the Library of Congress system is not only more adaptable but it offers the further advantage of providing complete data for cataloging at the same time. This topic will be elaborated below to support our recommendations for rapid conversion of all of our library as circumstances permit. We will return to this subject. At this time, we are pleased to report a strong beginning in what we believe to be a proper and inevitable change.

Another important change was made this year in moving our library into the current of modern developments. We have made a modest beginning in long-range planning for automation with the employment on a part-time basis of a computer specialist. This new employee, Mr. Charles Antle, will study the possibility of applying electronic data processing to the circulation of books, as well as to other library operations. It is felt that a member of the library staff can better plan for possible

## UNIVERSITY OF NORTH CAROLINA LIBRARY

automation than an outside consultant. We have already taken steps towards applying electronic data processing techniques to library purposes. The Library's holdings of some 30,000 serial titles have been key punched, and, as of this writing, the punched cards are ready for transfer to magnetic tape. A program has been written in COBOL for the IBM 360, and printouts of the serial holdings will soon be available. This operation will enable us to provide a complete record of serial publications at all key locations on our own campus and related campuses, where before we had only one record in one place. It will make it possible to keep the record current automatically, and it will sharpen our understanding of computer technology for other much larger applications of computers we see ahead.

Realizing the futility of flogging a dead horse, we cannot fail to report our conviction that if the delays experienced in bringing the Undergraduate Library to the point of availability represent a norm, this Library will not be able to meet the demands for service it anticipates. With the Undergraduate Library now two years behind schedule, we are having to use desperate measures to accommodate the 50,000 volumes now in its collection and to provide seats for even ten percent of the designated student group. The physical structures planned for the future growth of the Library are key elements in the expanding university. Without constant attention to these needs, the growth of most academic programs is automatically circumscribed and inevitably stagnates. Later in the year we intend to present a detailed program of physical planning for all of the foreseeable future. For the present, we cannot fail to mark the coming biennium as the latest safe period for timely funding of our proposed Special Collections Library. With more than half of its cost in hand or in view from other sources, it seems impossible that this structure should not be funded in the biennium budget now being studied. Your own Administration, of course, must establish the priorities for our University; it is our hope that you will project the urgency of our need through every level of fund consideration.

To turn from problems or needs to more cheering subjects, we believe it timely here to report something that seldom occurs in academic library circles, sensational news.

This University Library and each of its peers is on the brink of a complete revolution in its internal operations, as a direct result of the new federal funding programs for research libraries. The inevitable result of these internal changes will be greater and constantly improving access by the entire academic community to the world's product of useful published data. Our planning for the future cannot fail to adopt and adapt itself to the new methods and their products or we fall behind our sister institutions where every advantage is clearly measured and utilized.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

In recent legislation the function of the Library of Congress as a bonafide National Library was implicitly acknowledged, and funds authorized to enable the Library of Congress to initiate a progressive plan for central cataloging of research library materials. On the face of it this sounds like a natural, simple, useful supplementary service, not unlike many specific projects that library has been carrying on for many years. In fact, as this plan has evolved and now stands, this is the most momentous and far-reaching development in the library world since Melvil Dewey conceived the unit card and the Library of Congress began to provide catalog cards to other libraries. This program can and must provide the answer to the unconscionable diversion of so large a proportion of library funds to the processing of books and preparation of catalogs. It is time and long past. Considering the present world output of research material we must handle and the obvious limits of manpower and money we have in fact found a great advance almost out of desperation.

The target area of the new planning, as announced, was central cataloging. That is, it was hoped to find a means of enabling the Library of Congress to supply all of us complete cataloging data for every book we acquire by the time that book reaches our library or sooner. Many of our constituent public yet believe this is what now happens. On the contrary, the Library of Congress supplies such data on our kind of acquisitions for less than 25% of our normal needs and that with delays of from four weeks to years. Because of those facts, we began some years ago to search for new methods of producing our own catalog cards for all of our needs and without delays. Today we do print 98% of the cards we use, and they are available within 48 hours after the book is cataloged. This sounds good and it has solved one problem, but a far more serious problem lies in the phrase "after the book is cataloged." Even if we could accept the delays in the delivery of cataloging data by the Library of Congress, we would still be left with 75% of our total input which we must catalog completely in our own staff. Using this year's numbers as an example, we report a total of 63,674 volumes added this year. 75% of that number is 47,755. Our cataloging efforts involve the full time of 40 members of the staff. By simple arithmetic it appears that the average staff member accounts for 1,194 volumes a year or five volumes a day. If our input doubles in ten years, and there is a sound basis for this to happen, we could not conceivably find or house the staff to cope with it by these methods, nor could we honorably justify the costs. We must seize any opportunity we have to rationalize our own practices and cooperate with national planning for the reduction of duplicative effort.

With this new legislation, the Library of Congress now plans to increase its acquisitions, country by country, until it is receiving the entire useful research production in books of the

## UNIVERSITY OF NORTH CAROLINA LIBRARY

entire literate world. It will progressively increase its staffing, and combining this with the efforts of staff abroad, will provide catalog data in printed or machine readable form for this entire input within a few weeks of publication. We can see the possibility of steadily reducing our own cataloging effort from 75% to 25% or less, with added savings in many of the mechanical but costly cataloging practices we now continue. We must seriously and prudently consider the adoption of the Library of Congress system of classification throughout the Library and the universal use of their subject headings as they appear on their cards. It is now abundantly evident that only by adopting such practices early can we cope with other demands increasingly made upon us. We have participated actively in testing of the new Library of Congress project, and we are now planning to adjust our own practices as rapidly as good coordination permits. At the first meeting of the Administrative Board of the Library we will initiate discussion of the classification system used in our libraries.

On September 1, we will establish a new department in Technical Processing to be the Catalog Maintenance Department. This new unit will have the full responsibility for planning, coordinating, and maintaining not only all our card catalogs, but any alternate forms of bibliographic access the new technology may develop. We will conduct a series of seminars with members of the technical processing staff to develop our detailed planning for making the changes we now face. We hope to bring our new specialist in electronic data processing into these discussions to assure the appropriate use of machines whenever they can be helpfully planned into our systems.

Another area which will be seriously affected by the new planning is Acquisitions and particularly book selection. As our library has grown and as the provision of book funds has increased the possibility of at least meeting current output, we have found steadily increasing duplication in faculty recommendations for purchase. The Faculty member is himself so pushed by the hordes of students he must handle that in many cases book selection is relegated to a student assistant or not carried out at all. This is normal in a fast-growing institution and happens everywhere. The Library must fill every gap and assure consistent, planned development of its collections for presently known needs and any foreseeable future requirement. It must also continuously strengthen the areas of strength it already has, with or without reference to ongoing programs, for these are the backbone of a great Library and a great University. The new planning at the Library of Congress is based upon the work of the Selection officers of that library. They will make the initial selection of the research titles from each country to be acquired by the Library of Congress. We will contribute our mite by informing the Library of Congress daily of those re-

## UNIVERSITY OF NORTH CAROLINA LIBRARY

search items *ordered* which have not yet been announced to us as items ordered by it or another one of the great research libraries. Every other major research library will be cooperating in this continuous flow of bibliographic information. We will thus have at hand a combined record, not only of what is available but who has it on order. We will have a tremendous selection source available to all. In order to use this well and economically, we plan to extend our selection group under the direction of the Chief Bibliographer, to work closely with the faculty toward the end that all *current production*, in whatever language, will be either in the library or on order by the time it comes to the attention of a faculty member. This will free each faculty member to give more exclusive time to the development of collections in his particular subject area in retrospective and antiquarian materials. This will involve a wholly new concept of fund management and considerably larger funds; this will also be brought before the Administrative Board.

With specific reference to funds for library materials, we have already submitted one proposal to introduce a new concept in funding. The urgency of decision in this area cannot be overlooked. In a recent paper read before the American Library Association<sup>1</sup> Dr. Gordon N. Ray, the President of the Guggenheim Foundation made the point in a cogent paragraph:

"Finally, I would inquire whether librarians are yet acting fully in consonance with the position of strength which they now enjoy. It has at last been recognized, in large part through the efforts of the profession's leaders, that community financing of public and school libraries no longer suffices for the country's needs. During the ten years between the Library Services Act of 1956 and the Higher Education Act of 1965, Congress has amply demonstrated its determination to support the nation's libraries as they should be supported, and further aid is in prospect. But in our universities, where one might reasonably expect to find the strongest backing for libraries, the picture remains a doubtful one. As total university income has risen, particularly through federal research and grant funds, there has been a decrease in the proportion of university funds allocated to library support. Hence librarians have fallen into the habit of regarding what they call "the continued exponential growth in research libraries" as a cause for dismay rather than congratulation. More appropriate would be a firm insistence, not only by librarians but by the scholarly community as a whole, that library development should be given equal priority with laboratory development in university planning. Then the necessary money would assuredly be found."

The impact of the combined acquisition record will be felt in the Acquisitions Department as much as elsewhere. Problems of searching for positive identification and subsequent verification of need will be progressively reduced to a minimum by making this record file the initial element in search for all current production. As increasing numbers of items appear in this file it can serve as the unique source, not only for acquisition

---

## UNIVERSITY OF NORTH CAROLINA LIBRARY

data but for the entire processing effort. The Acquisitions Department would find everything it needs to order the book, and conceivably the unit card set could be completed and ready for the book by the time it reaches the library. It is possible that the searching process, supported by such a formidable tool, could lead to a completed cataloging effort for all current production, thus expediting even further the rapid movement of new materials to the shelves.

This long-sought improvement in processing will also bring added benefits in service to readers and researchers. We have already mentioned the usefulness of the combined order file as a location device. We have pointed out the potential value of this continuous reporting of new titles as a selection tool. There are, in addition, some less obvious benefits to be derived in extending the bibliographical information available to the Reference librarian, and the great saving in time achieved by combining the record of all foreign production in one place. An alert reference staff will expand this subject competence in any field by periodic scanning of new additions to the file.

Thus, any library wise enough and versatile enough to wring out what it should from this most promising new resource has within its grasp the means of reversing the proportions of expenditures for processing and expenditures for materials and their exploitation. Savings from the one can be applied to the other; indeed, the wealth of new production demands it. It is this same demand which compels us to study every useful application of electronic data processing. In both of these fields we must not fail to lead.

The following pages of this report reflect other aspects of the Library's work. The tables provide objective and tangible evidence of a healthy organism responding to increasing service loads. It is with distinct pleasure that I here record my keen appreciation of the contributions made to our library by Dr. John Gribbin, Dr. Richard Dougherty, and Mr. William Pease during their years of service here. It is gratifying to us, in losing them, to see each of them taking a large step upward to professional recognition. To these and all the staff my thanks for a productive year. We are all grateful for the friendly and considerate assistance from the numerous areas of University administration and to its principals. These are difficult times for all of us. As one part of the University singularly dependent upon stability and continuity for development, we are grateful for your patient efforts to provide for our needs. In return I can only renew my assurance that our primary goal is to support the University's teaching and research program. We believe that notable progress has been made in the past year; we hope that our planning for the coming years will assure sound development and greater service.

JERROLD ORNE  
*University Librarian*

NOTABLE ACQUISITIONS

OF

THE YEAR

AND

THE YEAR'S DONORS

## NOTABLE ACQUISITIONS

Special attention was given throughout the year to completion of sets of periodicals. Nearly 3,000 titles having gaps in holdings were investigated, and 147 were selected for completion or partial completion. Those purchases involving substantial sums of money were selected, as usual, by the Research Fund Committee of the Administrative Board on the Library, whereas the Chief Bibliographer made selections of less expensive items. As a matter of special interest this year, forty-four periodical titles are presented below for which holdings were completed, or for which substantial progress towards completion was made

Other noteworthy acquisitions are too numerous for listing here, but it should be mentioned that 103 other periodical titles were partially completed, and hundreds of monographs were purchased with funds from the bequest of William Asbury Whitaker. In the latter group, one may find twenty-one books printed before 1700, twenty-five eighteenth century imprints, good representation of Australian authors (who had heretofore been somewhat neglected in the UNC Library), and two hundred books and periodicals relating to the well-known English "public school," Eton College. The year 1965/66 can be regarded as a significant one in both the number and quality of important additions to the Library.

To illustrate the year's accent on completions, the following three lists are presented:

### RESEARCH FUND COMPLETIONS

BOTANISCHE JAHRBÜCHER FÜR SYSTEMATIK PFLANZEN-  
GESCHICHTE UND PFLANZENGEOGRAPHIE. Stuttgart.  
1881-date.

DOD'S PARLIAMENTARY COMPANION. London. 1832-1909.  
International Military Tribunal for the Far East. PROCEEDINGS,  
1946-1948. (microfilm)

ISIS. Brussels. 1913-date.

PRITOMNOST. Prague. 1924-1939.

VOX ROMANICA. Zurich. 1936-date.

ZENTRALBLATT FÜR BIBLIOTHEKSWESSEN. Leipzig. 1884-date.

### RESEARCH FUND PARTIAL COMPLETIONS

Akademii Nauk SSSR. BULLETIN—GEOPHYSICS SERIES. (Eng.  
translation) Washington. (Still lacking 1959)

BIBLIOGRAPHIE DE BELGIQUE. Brussels. (Still lacking v. 1-64,  
74-84)

THE CANON, AUSTRALIAN JOURNAL OF MUSIC. Hunter's Hill,  
N.S.W. (Missing issues in v. 1, 3, 5-16)

ČESKÝ LID. Prague. (Still lacking v. 32)

THE CHINA YEAR BOOK. London. (Still lacking v. 1912-1918,  
1920, 1927, 1930, 1937)

Deutsche Geologische Gesellschaft. Berlin. ZEITSCHRIFT. (Still  
lacking v. 1-48, 55-84, 89-90, 92-104)

## UNIVERSITY OF NORTH CAROLINA LIBRARY

JAHRBUCH DER KUNSTHISTORISCHEN SAMMLUNGEN. Vienna. (Still lacking v. 19, 32, 35; N.S. v. 5-12)

MATEMATICHESKII SBORNIK. Moscow. (Still lacking v. 46, 62; missing issues in v. 52-53.)

NOVÉ ZAKONY A NARIZENI PROTEKTORATU CECHY A MORAVA. Prague. (Missing issues in v. 1949)

ZEITSCHRIFT FÜR DIE GESAMTE STAATSWISSENSCHAFT. Tübingen. (Still lacking v. 1, 18, 22-23, 31-36, 38-40, 42-45, 47-48, 68-69, 99, 101-104)

### OTHER COMPLETIONS (SELECTED)

Akademiia Nauk. Institut Slavianovedeniia. UCHENYE ZAPISKI. Moscow. 1949-date.

ANNALES RÉVOLUTIONNAIRES. Paris. 1908-1923.

ASIA MAJOR. Leipzig. 1924-date.

AUSTRALIAN JOURNAL OF HIGHER EDUCATION. Perth. 1961-date.

BIBLIOGRAFIE ČESKÉ LINGUISTIKY. Prague. 1945-date.

CAHIERS D'ÉTUDE DES SOCIÉTÉS INDUSTRIELLES ET DE L'AUTOMATION. Paris. 1957-date.

The CHAP-BOOK. Chicago. 1894-1898.

CULTURA NEOLATINA. Modena. 1941-date.

DELAWARE HISTORY. Wilmington. 1946-date.

DISCOURSE, A REVIEW OF THE LIBERAL ARTS. Moorhead, Minn. 1958-date.

LE FIGARO. Paris. 1854-date.

Germany. (Federal Republic, 1949-). Bundestag. VERHANDLUNGEN; STENOGRAPHISCHE BERICHTE. Bonn. 1949-date.

INTERNATIONALE BIBLIOGRAPHIE DER ZEITSCHRIFTEN-LITERATUR. Abteilung C. Leipzig. 1900-1943.

ISTORICHESKII ZHURNAL. Moscow. 1931-1945.

KNIZHNAIA LETOPIS'. Moscow. 1907-date.

LITERATURE AND PSYCHOLOGY. New York. 1951-date.

NEW ENGLAND MAGAZINE. Boston. 1831-1835.

OPERATIONAL RESEARCH QUARTERLY. London. 1950-date.

Russia. Tsentral'nyi statisticheskii Komitet. PERVAIA VSEOBSHCHAIA. St. Petersburg. 1899-1905.

SARTAIN'S UNION MAGAZINE OF LITERATURE AND ART. New York. 1847-1852.

SIBIR'W PERIOD STROITEL'STVA SOTSIALIZMA I PEREKHODA K KOMMUNIZMU. Novosibirsk. 1962-date.

Société des Amis de Marcel Proust et des Amis de Combray. BULLETIN. Illers. 1950-date.

SOUTHERN HISTORICAL SOCIETY PAPERS. Richmond, Va. 1876-1959.

STARINA I NOVIZNA. St. Petersburg. 1897-1917.

THE TIMES. (London) OFFICIAL INDEX. 1914-date.

United Nations Educational, Scientific, and Cultural Organization. UNESCO BULLETIN FOR LIBRARIES. Paris. 1947-date.

WORT UND WAHRHEIT. Vienna. 1946-date.

INDIVIDUAL DONORS TO THE

# ANNUAL REPORT OF THE UNIVERSITY LIBRARY FOR THE FISCAL YEAR 1966-1967

August 1, 1967

*To the Chancellor of the University:*

In recent years various prophets have predicted the demise of the printed word and its replacement by electronic media as man's primary mode of communication. Their thesis has been encapsulated in the catch-phrase of Marshall McLuhan, "the medium is the message."

Whatever may lie in the future, the scholars of the present generation have not got the message. They continue, as have their predecessors since Gutenberg, to produce an ever-increasing flood of printed matter which libraries must select, acquire and catalog. So long as scholars persist in publishing, the acquisition and bibliographic control of publications must remain one of the primary functions of a research library.

Equally important is the efficient servicing and interpretation of the library's resources to its users. In this area also, libraries are faced with an inundation, here composed of people rather than print, as more and more students, faculty and research personnel seek to meet their increasingly complex information needs.

In this report we focus upon some of our efforts over the past year to cope with the rising tides of print and people and to improve our means of servicing both.

## *National Program for Acquisitions and Cataloging*

During the year the Library effected a number of important changes designed to take the fullest possible advantage of a new centralized, comprehensive cataloging program established by the Library of Congress. A brief description of this program is necessary to explain the adjustments we are making to benefit from it.

Since the early years of this century the Library of Congress has provided catalog cards to other libraries. Even casual library users have been aware of the "L.C. cards" which appeared in their local library catalogs; from this many concluded that the Library of Congress offered a comprehensive cataloging service which eliminated the necessity for original cataloging by individual libraries. Such a utopia, unfortunately, was far from realization. Because of various deficiencies in its own acquisitions and cataloging program, particularly with respect to foreign book production, the Library of Congress actually furnished cataloging copy for less than half the titles acquired by large research libraries such as our own. The result was that each library had to prepare original cataloging for a large proportion

## UNIVERSITY OF NORTH CAROLINA LIBRARY

of its rising acquisitions, diverting increasing numbers of personnel to this task in a slowly but steadily and assuredly losing battle.

The waste of library manpower resulting from lack of a centralized national cataloging program has long been evident. Only recently, however, with the passage of the Higher Education Act of 1965, was the Library of Congress provided with the authority and funding to establish such a program. Under the National Program for Acquisitions and Cataloging, the Congressional library has assumed two significant responsibilities: to "acquire all library materials currently published throughout the world of value to scholarship" and to provide prompt cataloging information on these materials to other libraries. Since passage of the Act, the Library of Congress has established offices in many of the major book-producing countries of Europe and plans to extend its operations throughout the world as additional funds allow. Eventually we can expect that full cataloging information will be provided for eighty or ninety percent of the publications which a research library such as ours would acquire.

While the full potential of the new program will not be realized for some time, we have restructured our operations in such a way as to derive maximum present and future savings from it. In October we changed our system of classifying materials from the Dewey Decimal to the Library of Congress. Though a number of factors contributed to this decision, the economic advantage of tying closely into the L.C. cataloging information output was basic. Adoption of the Library of Congress classification allows us to use, without change, all the cataloging information provided by L.C. By relieving us of the need of our staff time to classify many of our incoming acquisitions, substantial professional personnel time can be gained.

When the new national program became operational in August, 1966, the Library of Congress began to distribute "depository sets" of its catalog cards to research libraries. In procedural terms, this represented only a minor modification of L.C.'s previous program of making its cataloging information available to other libraries. It was clear, however, that a major substantive change was imminent, since L.C.'s expanded program of acquiring and cataloging foreign titles, plus the promise of more extensive and faster coverage of domestic production, would make the Library of Congress a far more productive source of cataloging copy for research libraries than it has been in the past. With this in mind, we also reorganized our acquisitions and cataloging procedures to make maximum use of this new information. This is not the place for detail; the essential change involved establishing procedures by which clerical personnel could be used to catalog books for which Library of Congress copy was available, whereas in the past professional catalogers usually did this work.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

This development not only promises substantial personnel savings; it also provides for a dramatic reduction in the time required to catalog incoming books. Heretofore this time lag has been a serious inconvenience to faculty members who order books only to find they must wait several weeks or months before they are processed and available for use. The concrete benefits of the new program are clearly evident here. For example, faculty and student demands are heaviest and most urgent for recently published American books. Using the L.C. depository file in conjunction with our new processing procedures, we now find that we can catalog sixty percent of the current American books we order *in advance* of receipt of the books themselves. "Processing time" thus is virtually eliminated, and these books are on the shelves within a week, at the latest, of the date they are received in the Library's Acquisitions Department. So far only a small proportion of our total acquisitions can be processed so expeditiously, but this proportion will rise as the Library of Congress enlarges and accelerates its own acquisitions and cataloging procedures.

We believe that, in this new program, a means has been found to halt and perhaps reverse the tendency toward the growing proportion of professional personnel in research libraries required for the cataloging function. To the extent this can be done, we will be in a far better position to provide the personal bibliographic and research assistance which students and faculty now need in using our increasingly complex libraries.

### *Undergraduate Library*

In 1952, the year in which the Wilson Library building was expanded to its present capacity, the University enrolled 4,764 undergraduate students. Undergraduate enrollment in the fall of 1966 stood at 9,492. Thus over a span of fourteen years the library system had to absorb a 100 percent increase in the numerical service load to undergraduates without additional space. The present Undergraduate Library, simply a wing of the Wilson Library, has a seating capacity of only 200, or two percent of the present undergraduate body.

It is gratifying to be able to report imminent relief from the crowded conditions which developed during this period. The new Undergraduate Library is under construction, and we hope to move into the new quarters in time for the fall semester of 1968.

We will be well prepared to use the new facility for expanded and improved services to undergraduates. Our present Undergraduate Library collection contains over 48,000 volumes, carefully selected by the library staff and cooperating faculty members specifically to meet the instructional and recreational reading needs of undergraduate students. The new building will have space for 100,000 volumes, a number considered adequate

## UNIVERSITY OF NORTH CAROLINA LIBRARY

for the normal requirements of undergraduates. We will build up to this figure rapidly over the next few years, then maintain the collection at that level by careful weeding and retirement of older and little-used books.

We have also begun to increase our staffing of the Undergraduate Library in anticipation of the new facility. Heretofore this staff has been very small due to space considerations and our inability to offer any meaningful reference and reader advisory services to students under existing conditions. We must expand and improve these services if the Undergraduate Library is to be more than a shiny new study hall.

### *Growth of Graduate Programs and Research*

While we can reasonably expect to provide adequate service to undergraduates with a constantly-renewed collection of 100,000 volumes, no such happily limited commitment confronts us on the graduate level. It has long been recognized that the informational demands arising from graduate instruction and faculty research lie behind the enormous growth of research libraries. These pressures are clearly evident in our own situation. From a 1952 enrollment of 713 graduate students, the University had expanded by the fall of 1966 to 2,874 graduate students, an increase of 300 percent.

With respect to demands for library services, moreover, the number and type of graduate programs are equally or more significant than raw numbers of students. When the University establishes a graduate program in a given discipline, the Library automatically is committed to provide the informational base to support it. Though additional resources obviously are required as student enrollment in a program rises, it is the building of this initial base—and its maintenance as more and more publications appear in the discipline—which constitutes the major cost. From this perspective, the number of graduate programs on our campus in relation to the library's resources to support them is rather sobering when compared with other American university libraries.

Traditionally, research libraries have been compared in terms of such variables as volumes held and annual expenditures for books and other materials. Each year the Association of Research Libraries, comprising the sixty-odd largest academic libraries in the country, publishes statistics which provide the basis for such comparisons. The University of North Carolina does not fare too badly in these traditional rankings. In terms of volumes held, for example, we rank 24th among the sixty-one largest libraries in the country. Only two Southern libraries, Texas (16th) and Duke (17th) rank higher. In terms of annual expenditure for books and other library materials, UNC ranks 32nd; here Texas ranks 12th and, with its oil revenues, is far beyond our reach; Duke is comfortably close in the 30th position.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Comparison in terms of such gross variables as these has serious deficiencies. Perhaps the most serious is that, in the jargon of the systems analyst, it deals only with "input" variables and ignores such "demand" variables as number and level of students or number and type of teaching and research programs for which libraries must provide informational support. Unfortunately, the data necessary for analysis in terms of "demands" is not at all adequate. In recent years, however, the U. S. Office of Education has published a statistical series on *Enrollment for Master's and Higher Degrees* which provides some useful comparative data. This source indicates enrollment, by "fields of study," in all American universities which grant graduate degrees. The latest volume of this series, for the academic year 1964-65, lists 163 different "fields of study" and shows the enrollment in each field in 704 institutions. Using this information in conjunction with available library statistics, we have attempted to devise a more realistic basis of comparison which incorporates the two "demand" variables of number of graduate programs, or "fields of study," and number of graduate students with the "input" variable of annual expenditures for books and other library materials. Ratios of expenditure per field of study and expenditure per graduate student were calculated for each member library of the Association of Research Libraries. The following table presents the results in summary form.

	No. of fields of study	Library materials expenditure per field	Library materials expenditure per graduate student <sup>1</sup>
High institution	107	\$31,773	\$667
Median institution	54	10,222	225
Low institution	13	4,348	79
North Carolina	61	9,538 (35)	296 (23)
Duke	32	19,120 (8)	667 (1)

Thus, out of the sixty-one members of the Association of Research Libraries for which data are available, UNC ranks 35th in the amount spent for library materials per field of study. Because of a relatively low total graduate enrollment, we rank 23rd in expenditure per graduate student.

When "demands" are taken into account, even in so rough a manner as this, Duke and UNC part company very sharply. Duke ranks 8th among American universities in expenditure per field of study and 1st in expenditure per graduate student. In both cases, Duke has twice the resources available in relation to demands arising from graduate instruction and research than does UNC.

This basis of comparison, though more realistic than the traditional comparisons, itself has one serious weakness. It assumes an equality of library demand among all fields of study, and this obviously is not the case. We know, for example, that

1. In calculating this ratio, "part-time" students were counted as one-half, thus arriving at a rough measure of "full-time equivalent" graduate students for each institution.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

far greater library resources are required to support a graduate program in history than in physics. Ideally, we should construct an "index of library demand" for each field, based perhaps upon the rate of publication in a field and the rate of use of library materials by students in the field. Given the lack of data adequate to this purpose, however, the best we can do at present is a largely intuitive ranking of fields in terms of their need for library materials. If we classify fields under the three broad rubrics of Humanities, Social Sciences, and Physical, Natural and Applied Sciences, most authorities would agree that the Humanities and Social Sciences require considerably more library support than do the Physical, Natural and Applied Sciences.

From this perspective, the demands experienced by the UNC Library appear to be rather strikingly atypical. Using Office of Education data on graduate enrollment, the following table shows proportionate enrollment in these broad areas in American universities as a whole, UNC, and Duke.

### *Comparison of Graduate Enrollment by Subject Fields<sup>1</sup>*

	<i>Aggregate U.S.<sup>2</sup></i>	<i>UNC</i>	<i>Duke</i>
Humanities	50,477 (18%)	536 (27%)	220 (21%)
Social Sciences <sup>3</sup>	89,544 (31%)	670 (35%)	271 (26%)
Physical, Natural & Applied Sciences	144,852 (51%)	734 (38%)	542 (53%)
	284,873	1,940	1,033

The Humanities and Social Sciences together account for 49 percent of the enrollment in U. S. universities as a whole, 47 percent at Duke, and 62 percent at UNC. Thus it appears that graduate instruction and research at UNC is disproportionately concentrated in those subject fields which require the greatest library support.

We believe it is appropriate and necessary to stress these often-overlooked relationships between graduate programs and library support at this time. Every evidence points to further substantial growth on the graduate level here in the near future. In his current annual report the Dean of the Graduate School notes that "Present plans (formulated in 1965 and approved by the Chancellor) call for graduate enrollment to increase 10 percent per year through 1976, by which time graduate enrollment is projected to be 5,800." Apparently we must prepare for a doubling of the present graduate enrollment over the next decade

1. Classification of subject fields follows the organizational pattern for UNC indicated on pages 39-40 of the Graduate School Record, except that those fields falling under the Division of Professional Schools are assigned to one of the three broad areas.

2. Based on graduate enrollment in 652 institutions.

3. The Office of Education reports 123,241 graduate students in the field of education. This accounts for almost one-third of total graduate enrollment and reflects the output of a large number of teacher's colleges specializing in this field. Because of this heavy over-representation, enrollment in education was omitted from the table.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

and the addition of a number of new graduate programs. Obviously, we must begin to devote increasing resources to graduate instruction and research needs if we are to maintain, much less improve, our capacity to support the University's position of leadership in the region and nation.

### *Funding for Library Materials*

The most significant development of the year in Library funding was the allocation of a portion of NDEA Title IV "cost of education" grant funds to the Library. These funds, amounting to \$56,000 for fiscal 1966, were expended entirely for books and other library materials.

This allocation explicitly recognizes a fact of which we have long been aware, that federal support of graduate training and research results in significant demands upon the Library as well as upon teaching departments and other segments of the University. We wish to express our appreciation to the Special Committee on Allocation of Institutional Grant funds, as well as to you personally, for this recognition and support.

At the same time, we cannot fail to point out that a severe imbalance remains between the demands for Library materials and services arising from research and training grants and contracts and the Library resources to meet these demands. Within the last decade the University has attracted increasingly large sums from non-state sources, primarily from the federal government, to support graduate training and faculty research. During 1966-67, for example, 1,062 graduate students received over \$2,800,000 in financial assistance from non-state sources, with most of the support coming from the federal government. In addition, 388 grants and contracts worth over \$18,000,000 were received from non-state funding sources, with approximately \$16,500,000 or 90 percent, coming from the federal government in that year. Through these non-state sources of support, the University attracts many students and faculty whose informational demands the Library must meet almost entirely from state appropriated funds. While 20 percent of the University's current funds during 1965-66 came from federal research and training sources, less than 2 percent of the Library budget came from federal sources.

Clearly, the graduate training and research programs on this campus will continue to grow and to spur increasing demands for library materials and service. Already, we have begun to fall behind universities of comparable or lesser stature in the resources devoted to meeting these demands. It seems most doubtful to us that we can maintain or improve our situation through continuing dependence upon state or endowed funds. We must, we believe, look to the source which now is stimulating so large a part of our demands, that is to federal funds. In its report on NDEA Title IV grants, the Special Committee on

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Allocation of Institutional Grant Funds recommended that "additional cost-of-education funds and institutional grants which may come to us under other programs or augmented forms of the existing programs be handled on this same prorated basis." We would respectfully suggest that this or some other reasonable assignment of federal monies must be made to prevent serious deterioration in the Library's ability to support the University's research and training programs.

### *Library Automation Projects*

We have three projects underway or planned involving the application of electronic data processing to library materials and operations. In July, 1966, after almost two years of planning and development, we produced computer printouts of the Library's holdings of over 30,000 periodicals and serials. These printouts were distributed to campus departmental libraries, to other libraries of the Consolidated University, and to Duke. This initial, basic record was stored on magnetic tape; in addition, cards have been punched for new titles and volumes added to the Library collections, as well as for the holdings of several departmental libraries and special collections not represented in the initial record. Last month these additional cards were transferred to tape, integrated with the initial record, and updated printouts produced which now represent a comprehensive listing of all serials and periodicals in the University Library system.

So far the high cost of producing copies of our serials list via computer printout has limited the potential benefits of this project. We now have eighteen copies of a record which previously existed, in incomplete form, only in the Serials Catalog in Wilson Library. With a comparatively small additional expenditure, we could reproduce many additional copies via photo-offset printing. Our own modest printing budget has not been sufficient to absorb this cost, but we now have reasonable prospects of securing gift funds for this purpose. Assuming that we obtain such funding, sometime this fall we should be able to provide copies for all departments on campus, for many faculty members, and for other libraries across the state.

Our second project involves development of an automated circulation system to be applied initially in the Undergraduate Library, then extended to Wilson Library. Our planning and specifications for this system have been completed, and key-punching of book cards for the Undergraduate Library collection has begun. This project, however, remains unbudgeted. In order to get it under way, we are prepared to absorb the cost of coding and card punching with our present personnel and equipment. To go beyond this, careful estimates of data processing equipment and operational costs have been submitted to the University Budget Office. It will be technically possible to install this system within the present biennium, but this will require addi-

## UNIVERSITY OF NORTH CAROLINA LIBRARY

tional funding beyond our present budget. A third project involving automation of serials acquisitions records is in an early planning stage.

Our initial experience with automation applications convinces us that continued development in this area will require unequivocal commitments on funding and availability of computer time. With an automated circulation system we will have a daily requirement for computer time which must be guaranteed if the system is to function adequately. We have apprised the concerned administrative officers of these requirements and trust the necessary commitments will be forthcoming.

### *Personnel*

During the year we experienced significant personnel changes on all levels. Last year we reported the resignation of Dr. John Gribbin as Associate Librarian to become Director of Libraries at Tulane University. Since September Mr. Clifton Brock, who had been with us as Chief of the Business Administration and Social Sciences Division since 1959, has served as Acting Associate Librarian.

Mr. Donald Axman, Chief of the Catalog Department, resigned in April to become Assistant Director of Libraries at the University of Connecticut. Mr. Axman's departure came at a time when operational changes in our acquisitions and cataloging procedures were leading to substantial integration of these functions. Coordinated supervision in these areas had become essential, thus we established a new position of Chief of Technical Processing, with administrative responsibility for both the Acquisitions and Catalog Departments. Mr. Ashby Fristoe, formerly Chief of the Acquisitions Department, was appointed Chief of Technical Processing in April. At the same time Miss Beatrice Montgomery, formerly head of the Catalog Maintenance Department, was made Chief of the Catalog Department. Our staffing in this area was completed in June when Mrs. Minnie P. Schaberg, formerly the Librarian of Mary Institute in St. Louis, joined us as Chief of the Acquisitions Department.

In other areas as well we were fortunate to be able to call upon competent and experienced members of our own staff to fill supervisory vacancies. Mrs. Louise Hawkins served as Acting Chief of the Business Administration and Social Sciences Division from September until June, when Mr. D. W. Schneider joined us as Chief of this Division. Since the resignation in September of Mr. William A. Pease as Undergraduate Librarian, Mrs. Rhoda Channing has served ably as Acting Undergraduate Librarian.

Other professional staff changes included the resignation of Miss Lois Fullerton as Cataloger, and Mrs. Sue Moody and Mrs. Malone Stinson as Librarians in the Business Administration and Social Sciences Division. New professionals welcomed to the staff during the year were: Mrs. Louise Deshaies as Cataloger,

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Mrs. Suad Jones as Librarian in the Bibliographical Services Division, Mrs. Frances Wilhoit as Librarian in the Business Administration and Social Sciences Division, and Mrs. Mary Stephenson and Mrs. Lois Upham as Librarians in the Acquisitions Department.

We have made great efforts in recent years to attract able librarians to our staff, to retain them and to prepare them for more responsible positions. We have done better in this, I think, than our salary levels alone would allow us to expect. The opportunity to be associated with a leading university obviously contributes to our success in these efforts. We would like to believe, also, that the opportunity to work in a dynamic library which shares in and contributes to the stature of its university plays a part. Whatever the reasons, we would have been poorly served indeed during this year of exceptional staff turnover had we not been in a position to draw upon a corps of able people already on our staff and to continue to attract others to us. "Intangible" attractions will go only so far, however. It is quite clear that, in the face of increasingly vigorous competition for professional librarians from government, industry, and other academic institutions, we dare not slacken in our efforts to provide more tangible rewards.

This is an appropriate time to signal one other extremely critical matter in the development of the university's libraries; this is the eternal question of how far library centralization (or decentralization) can go in a given institution at a given time. Our university is growing larger in ways already described. With all new construction on many campuses inevitably there are demands for special use of space and most particularly, for small subject-limited libraries. Although we have faculty legislation on this matter, we lack a clear and unequivocal administrative statement of policy, much needed at this time. There will certainly be ever-increasing pressures for more departmental libraries as the numbers of our research-level personnel increase. An administrative decision should be taken soon, since such a decision may be infinitely more difficult five years hence. We recommend your earliest attention to this as a matter of vital urgency.

The past year has seen solid growth and rapid development in the library's resources and design for service. None of this would be possible without the faithful devotion of the staff of the library, the active participation of the faculty and the cooperative support of your administration. Let me here record my own great personal appreciation to all of these and express the hope that the next ten years may be as healthy and productive for the libraries as the ten year span we are just now completing.

JERROLD ORNE

NOTABLE ACQUISITIONS  
OF  
THE YEAR  
AND  
THE YEAR'S DONORS

## NOTABLE ACQUISITIONS

During the year 1966-1967, the library's book and periodical collections have continued to grow vigorously in virtually all subject areas represented as active academic interests at the University. Only a few items can be singled out for special mention; the majority of these were selected by the Research Fund Committee which authorized the following sets to be ordered (here arranged by subject fields most directly concerned):

### (a) *Research Fund acquisitions*

#### ART

- André, Albert. *L'ATELIER DE RENOIR*. Paris, 1931. 2 vols.  
Florence. *Galleria degli Uffizi. I DISEGNI DELLA R. GALLERIA DEGLI UFFIZI*. Florence, 1912-21. 16 vols.  
Sandrart, Joachim von. *TEUTSCHE ACADEMIE DER EDLEN BAU-, BILD- UND MAHLEREY-KÜNSTE*. Nuremberg, 1675-1679. 5 vols. in 2 (1966 reprint ed.).

#### BOTANY

- Halacsy, E. *CONSPECTUS FLORAE GRAECAE ET SUPPLEMENTUM*. New York, 1967 reprint. 4 vols. in 3.  
Huber-Pestalozzi, Gottfried. *DAS PHYTOPLANKTON DES SÜSS-WASSERS*. Stuttgart, 1938-1961. 5 vols. in 6.  
Lyngbye, Hans Christian. *TENTAMEN HYDROPHYTOLOGIE DANICAE*. Hafniae, 1819.  
Merxmüller, Hermann, ed. *PRODROMUS EINER FLORA VON SÜDWESTAFRIKA*. Lehre, 1966-1969. ca. 40 parts.

#### CLASSICS

- AMPURIAS. Barcelona, 1945-1961. Vols. 7-23.  
ARCHIVO ESPANOL DE ARQUEOLOGIA. Madrid, 1940-64. Vols. 14-37.  
Curtius, Ernst, and Adler, Friedrich, eds. *OLYMPIA: DIE ERGEBNISSE DER VON DEM DEUTSCHEN REICH VERANSTALTETEN AUSGRABUNGEN*. Amsterdam, 1966 (reprint). 5 vols. of text, 4 vols. of plates, and atlas.  
Repetti, Emanuele, comp. *DIZIONARIO GEOGRAFICO, FISICO, STORICO DELLA TOSCANA*. Rome, 1963 (reprint). 6 vols. of text, 1 vol. supplement.

#### ECONOMICS

- Germany. Statistisches Reichsamt. *STATISTIK DES DEUTSCHEN REICHS*. n.F. (neg. microfilm for) vols. 1-7, 101-119, and 201-222.

#### ENGLISH

- IRISH NEWSPAPERS PRIOR TO 1750 IN DUBLIN LIBRARIES. Series I and Series II (1751-1825).  
Landor, Walter Savage. *THE COMPLETE WORKS*, ed. T. E. Welby. London, 1927-1936. 16 vols.

#### FAR EASTERN STUDIES

- KUO-CH'AO CH'I-HSIEN LEI'CHENG CH'U-PIEN. (*Collection of classified biographies of famous men of the Ch'ing period, 1644-1911*). 1890; (reprint).  
PEIPING T'U-SHU-KUAN-K'AN. (*Bulletin of the National Library of Peking*). Peking, 1928-1937. 1966 (reprint). 10 vols.

RUSSKIIA VIEDOMOSTI. Moscow, 1863-1918. 47 reels of microfilm.  
Schaller, Janoslaus. TOPOGRAPHIE DES KONIGREICHES BOHMEN. Prague, 1785-1791. 16 vols. and index.

Riess, L. and Delbrück, E., eds. SCHULTHESS' EUROPAISCHER GESCHICHTSKALENDER. Munich, 1860-1902. Vols. 1-43.

Slovakia. Laws, Statutes, etc. URADNE NOVINY. Bratislava, 1939-1944. 8 vols.

WISSENSCHAFTLICHE MITTHEILUNGEN AUS BOSNIEN UND HERCEGOVINA. Vienna, 1893-1916. 13 vols.

### MUSIC

New York (City). Public Library. DICTIONARY CATALOG OF THE MUSIC COLLECTION. Boston, 1965. 33 vols.

Liszt, Franz. SAMTLICHE WERKE. Leipzig, 1901-1936. (reprint ed.) 34 vols.

Friedrich II, der Grosse, King of Prussia. MUSIKALISCHE WERKE. Leipzig, 1889. 7 vols.

NEUE ZEITSCHRIFT FÜR MUSIK. 1884-1924. 82 vols. and 16 suppl. (reprint).

Scarlatti, Domenico. LIBRO DE XII SONATAS MODERNAS PARA CLAVICORDIO. London, J. Johnson, 1752.

SIGNALE FÜR DIE MUSIKALISCHE WELT. Leipzig, 1868-1925. Vols. 26-83.

### PHILOSOPHY

Schopenhauer-Gesellschaft. JAHRBUCH. Kiel, 1912-1963. Vols. 1-44.

### REGIONAL PLANNING

Braun, Georg. CIVITATES ORBIS TERRARUM: TOWNS OF THE WORLD. Amsterdam, 1965. (reprint). 3 vols.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

### ROMANCE LANGUAGES AND LITERATURE

Fréron, Elie Catherine. LETTRES SUR QUELQUES ÉCRITS DE CE TEMPS. Paris, 1749-54. (reprint). Vols. 1-13.

ANNÉE LITTÉRAIRE (FRÉRON). Amsterdam, 1754-1790. 292 vols. (microfiche).

Dante Alighieri. LA DIVINA COMMEDIA. Rome, 1965. 3 vols.

Zola, Emile. OEUVRES COMPLÈTES. Paris, Cercle du Livre Précieux, 1966-. 15 vols.

### SLAVIC LANGUAGES AND LITERATURES

Polska Akademia Umiejętności. Wydział Filologiczny. (= BULLETIN INTERNATIONAL). Cracow, 1901-1939.

SLASKI KWARTALNIK HISTORYCZNY SOBOTKA. Wrocław, 1946-1964. Vols. 1-19, #2.

Besides the above Research Fund acquisitions, the library has been fortunate in receiving some excellent gifts from private donors and added numerous fine editions with financial support from the Whitaker Fund.

The most notable addition to the Rare Book Collection during the past year was the purchase of the important classical collection of the late Professor Berthold L. Ullman. This acquisition was made possible by a generous gift from Miss Gertrude Weil. Of the 3,717 volumes in the Ullman collection, 263 are to be catalogued for the Rare Book Collection. Six of these are incunabula, sixty-seven are titles printed before 1600, and one hundred and ninety-two are from the seventeenth and eighteenth centuries.

Among the incunabula titles are: *Summa Theologicae* of Saint Thomas Aquinas. Venice, 1495; *De Remedio* (book 2) by Petrarch. Cremona, 1492; and *Comoediae* of Terence. Venice, 1480. The Latin authors of the classical period who are best represented in the collection are: Horace, Ovid, Vergil, Catullus, Cicero, Juvenal, Livy, Tibullus, Caesar, Plautus and Tacitus.

INDIVIDUAL DONORS TO THE  
UNIVERSITY OF NORTH CAROLINA LIBRARY  
1966-67

Miss Anna Brooke Allan	Pierce Mason Butler
J. Edward Allen	William Butler
Eric Ambler	Dr. Caroline I. Buttrick
Carl E. Anderson	Joseph P. Cacossa
Miss Lois Bacon	H. H. Caldwell
Mrs. Dudley W. Bagley	Mrs. E. A. Cameron
Mrs. Jane Bahnsen	Mrs. Frederick A. Camp
Mrs. H. C. Bailey	Chester & Dorris Carlson
Gary F. Barefoot	John Dickson Carr
Brandon Barringer	Douglas Carroll
Mrs. Edward T. Bartram	Mrs. Margaret Scruggs Carruth
Stephen B. Baxter	Jerry C. Cashion
Raymond B. Becker	Mrs. G. A. Charles
C. Richie Bell	John F. Clark
John Bell	Mrs. James McClure Clarke
Edward Bernard	Claude John Cheek
Mrs. R. P. Bivins	Mrs. Frank S. Coan
Mrs. Edwin A. Bjorkman	Frederick E. Coenen
Walter Blackstock	Fred Coker
J. C. D. Blaine	Robert E. Coker
Miss Florence Blakeley	Mrs. Dorothy M. Coleman
Richmond P. Bond	Charles E. Connelly
Mrs. Herbert C. Bonner	Mrs. Otelia Conner
Miss Mary Virginia Bonner	Miss Caroline P. Constable
Mrs. James Boyd	Harold D. Cooley
Mrs. Martin E. Boyer, Jr.	Mrs. Hal B. Cooper
Miss Mary Beattie Brady	Lyman Cotten
Mrs. Bernis Brien	Mrs. Lyman A. Cotten
Frederick P. Brooks	John N. Couch
Mrs. B. H. Brown	Mrs. Clinton G. Cox
Bruce K. Brown	Hardin Craig
Harlan Brown	Mrs. Christopher Crittenden
Lindley Butler	James Crouch

# ANNUAL REPORT OF THE UNIVERSITY LIBRARY FOR THE FISCAL YEAR 1967-68

August 1, 1968

*To the Chancellor of the University:*

It is with considerable pride that I submit my annual report on the progress of the University's Libraries for the year 1967-68. This has been a year of gratifying progress and growth; planning for the numerous imminent changes stemming from the opening of the new Undergraduate Library provides the invigorating assurance of more progress in the year to come.

The University Libraries have taken a sizeable step up in total additions, having added 85,476 volumes this year. This increase of nearly 15,000 over last year brings us much closer to our predicted peak of around 100,000 annually; it seems likely that we should reach and hold this level within the next two years. For our kind of University this represents a very respectable standard to attain. Our total library holdings for all libraries is now 1,821,756, of which 280,441 are in microforms, 1,541,315 in hardbound original format. The details of the collections in the various libraries are enumerated in Tables I and II, following.

The increased growth of the libraries (about 21%) was closely followed by the increased volume handled in our Acquisitions and Cataloging departments (about 16%). This derives from improved organization of work and staffing; the tangible results are more and swifter availability of all new materials and considerable cleaning out of remaining holdovers. The important changes in practice initiated and reported last year are now yielding increasing benefits to our using community. Most current domestic publications are available for use within forty-eight hours after arrival in the library; many foreign titles follow this same pattern. We are now adding over half a million cards a year to our library catalogs.

Our statistics of circulation have decreased this year, with a very large part of the decrease in the Reserve Reading area. This may be attributed to increasing use of paper-bound purchased books recommended to supplement a text, to a change in course method, or to any one of many causes. We are not addicted to numbers, or to ever-larger numbers in particular. All evidence we have within the library's reading rooms suggests steadily increasing use of the library and its collections, and more time in the library for both students and researchers. One of these evidences is the increasing importance of our photocopying service and interlibrary loan. Both of these functions are prime measures of research use, and they continue to claim an ever-greater place in our whole picture of service. Details of these services are found in Tables IV and V.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

The final table presents fiscal matters for the record. Our total expenditures for the fiscal year now exceed two million dollars. Of this sum, \$824,065 represents the total expenditures for Books, Periodicals and Binding; stated in percentages, about 39% of our budget goes into library materials. This is a relatively high percentage for a large university library. It should be thoughtfully noted that approximately 28% of this total was derived from non-state funds. This is a nice arrangement, but it cannot be regarded as a permanent or even continuing prospect. Any considerable change in federal programs could swiftly return us to second rate university library support and we cannot urge too strongly the establishment of more solid support by the State for its primary research library resource.

With these figures in view, it appears to me that we have reached a point in our library development where it is incumbent upon us to set our sights on broader goals and to once more make the University, through its library, both a catalyst and a central source for opening the world of learning to the whole State. Our thinking in this direction has been encouraged by national trends and parallel actions initiated in the several states, often precipitated by federal funds provided to promote such thinking. We have been watching these movements carefully, and have not been willing or ready to move in these directions until now. At this time, however, we believe you would want us to plan for the future and to have our best thoughts set forth to use in your own plans for the University.

Over the past ten years, we have bent our best efforts to the task of building up a major reservoir of research materials in our library's collections, capable of providing not only for local needs but also for those of all citizens of our state who must look to us for library research resources. We have sought to develop a library staff, effective and versatile enough to understand and plan for serving well all of the usual needs. We have also striven to bring into being the necessary physical facilities we will require to house both materials and staff in surroundings adequate to seat and serve all of our varied publics, the student body, researchers, faculty, and the quiet worker in the field at a distance. Though we have not achieved all of our goals, this year has seen good progress in each of these areas; we have used well the resources made available to us.

With the skeleton of our new Undergraduate Library rapidly taking form close beside us, we have felt a continuing compulsion to plan for the best possible utilization, not only of new space but also of older space to become available. This planning will take advantage of new space to be provided elsewhere for the School of Library Science and for the Bull's Head Bookshop. We can now project a wholly new concept of library service to specific elements of our using community never before possible. The division of services between major library units will make

## UNIVERSITY OF NORTH CAROLINA LIBRARY

of the new Undergraduate Library what might be called a "Course Library." That is, the users of that building will be primarily those who are concerned with preparation for courses of study, either in common tools of reference, in a limited general collection of current books and journals, or in assigned readings. The Wilson Library and most of the continuing departmental and school libraries are devoted to research types of inquiry. The upper classmen, the graduate student, and the Faculty member will find all he requires in one or another of these libraries. In each of our libraries we can now sharpen the character of the staff devoted to each type of service, and we can seek to minimize the deleterious effects of the noise and confusion attendant upon the need to serve a heterogeneous public in common fashion all at the same place.

Within the Wilson Library we can now convert the entire structure to a functional pattern offering far better potential for service than what we now have. The concept of public service on the second floor of a central library was appropriate and common forty years ago when the Wilson Library was planned; considering the needs and numbers we must now serve, such a plan is an anachronism. During the late summer and early autumn we will relocate many operations of the Library to provide infinitely better access and services to those who use the Wilson Library. We have been reviewing our planning for these changes with faculty members, students, administrative officers and our staff for over two years. By the opening of the Fall session, 1968, we will be well on the way to accomplishing the long-contemplated changeover.

In large scale the functioning of the Wilson Library can be very simply described. The side doors will be closed as entries, becoming available only as fire exits, and the front entrance will be made a unique control point for entrance and exit. The entrance level (floor 1) will provide all mechanical and bibliographic access. The Card Catalog, the Book Circulation service and entrance, stack and reading areas will open to this level. One level up (floor 2) will find an entire floor of reading rooms, Humanities, Business Administration, Social Sciences, Periodicals, and a central index area for all of these. One level down (Basement) will lead to what we might call exotic materials and auxiliary services. The Rare Book Rooms, the Manuscript Collections, and all Microforms and their service will be there. In addition, the Interlibrary Service Center, newly constituted and joined with the Photo Laboratory in providing extended services to the field, will be located at this level. Two levels above the entrance we plan to expand our provision of seminars and faculty studies and to provide long-needed development space for our bibliographic staff, with special provisions being made for those concerned with area studies to which we are committed.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Within the next year we must find some way of providing reading and study space for students living in the South dormitory area. This may begin with a simple auxiliary study hall, but the University must plan for a central dormitory library structure in the early future.

Our most urgent pressure for space is to serve the fast-growing graduate student body with individual library carrels and to house the increasing collections of the University Library. Accordingly, we have placed first among our building needs an extension of the Wilson Library book stack would give us one thousand new carrels, and shelving for one million volumes. This is minimal-cost space as libraries go, and maximum-yield space consonant with the directions of the University's growth. Our second need, no less critical, is the Special Collections Library for which we continue to seek private funds.

A major accomplishment of the year was the publication of the computer-based list of the entire periodical and serial collections in the University libraries. All current input is now recorded daily on punched cards, added to the record tape, and periodic supplements will be published to keep the list up to date. This great bibliographic source has been placed in every library of the state and in all the major research libraries of the nation. It is also widely available in faculty offices throughout the Consolidated University. The fifth number of our Library Studies series, a useful author authority list of mystery story writers, has been published and is now being appreciatively used in libraries all over the country.

It is abundantly clear from all evidence of local, regional and national library movements that we must plan diligently to share appropriately in the rapidly developing concepts of co-operative, coordinated, or combined service units, commonly referred to now as networks. Simply stated, this means that we can no longer stand alone, nor can others stand without us. We have here at Chapel Hill the greatest bibliothecal store our State possesses. It cannot be duplicated or matched within the State's resources; to try to equal it elsewhere in the State would be patent folly and fiscal irresponsibility. We long ago acknowledged our responsibility as the primary resource of the State by organizing the North Carolina Interlibrary Service Center and the North Carolina Union Catalog. The published serial list combined with these two activities represents a massive availability to the people of our state, but passive availability is not enough. Accordingly, we have sought and obtained the cooperation of the State Library and an assignment of federal funds to strengthen and actively extend this availability to the State. We now have full-time staff assigned to the Union Catalog for the first time in its thirty years of life. We have improved our TWX installation and are now supplemented by the Wide Area Telephone Service in the

## UNIVERSITY OF NORTH CAROLINA LIBRARY

State Library. We have acquired an additional vehicle and now provide daily delivery service to our cooperating regional libraries. We expect to extend this service to Greensboro and Charlotte as rapidly as the demand warrants it. We are now engaged in planning, with the State Library and the State Library Association, for the best attainable state-wide library service through all types of library agencies. To assure an appropriate service agency for this extended service to the State, we are establishing a new organizational unit in the Library under the direction of Mr. Sam Boone, designated the North Carolina Interlibrary Service Center. This unit will bring together Interlibrary lending, Photocopying Services, the Union Catalog, and reading and research in all microforms. We are confident that this organization will develop into a major service to all who can benefit from its extensive resources throughout North Carolina.

In conjunction with our efforts to extend the usefulness of our libraries to the whole State, we have been painfully aware of the manifold pressures upon State funding agencies to provide ever-increasing large sums of money to build up massive book collections in each of the new numerous academic institutions funded by the State. It is obvious to us that unrestrained scattering of resources results in extensive duplication and a corresponding dilution of the potential State-wide resources obtainable within the limited financial capacity of our State. As one part of our planning for long-range participation in the State and future nation-wide networks of information resources, we are considering a proposal for a North Carolina State Depository Research Library, to be located at Chapel Hill, not within the University Library, but possibly under its general direction. This Library would organize a program for providing housing and swift availability for the unique copy of books deposited by any of the academic libraries of the entire State, State-supported or private. It would comprise a central resource upon which any academic library could draw or use at will, and enable one copy of many titles to serve all the needs of all the institutions. The N. C. Interlibrary Service Center could be joined to it, and it would also serve as the central resource for the entire demand for seldom used but still needed volumes. Such a depository could also provide a home for books in limited demand in the large public libraries and the State Library itself. In short, the concept of a single major resource library, adjacent to the already massive State University Library, would guarantee maximum availability with the greatest economy for our State. We already have in being the bibliographic center, the communications needed, and improved delivery service. What remains is to work out the detailed agreements among the institutions concerned and to seek funds to provide the initial structure. In the coming year we will be giving much time and thought to this, and a detailed memorandum will be prepared.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

With the possibility of change in the use of space in the Wilson Library we will finally attain sufficient space and additional personnel resources to develop our area studies programs. These programs are based upon announced objectives of the University curricula and the Library aims to prepare itself as far in advance as possible for the demands which these curricula must inevitably place upon it. We plan to establish area studies rooms on the fourth floor of the Library for Slavic Studies, Latin American Studies and Asian Studies. Each of these will be attended by one of our bibliographers, either native or extremely well-based in the languages concerned. We hope to develop improved competence in bibliographic guidance, reference service, and processing by this change. We will also be providing individual study space for graduate students for each of the areas concerned. We hope that this new arrangement will make it possible for faculty involved in Area Studies programs to consult directly with library personnel devoted entirely to their particular field of interest. It is in this connection particularly that we are concerned for the financing of our growing collections. Any area studies program must be backed up in strength by especially assigned funds for the developing of the collections covering a broad range of subjects in a given area. Our present mode of available funds and assignment of those funds has not been able to take this into account. We have applied for federal grants to initiate a broader program of this kind. Of course, federal grants cannot be depended upon exclusively. Our appeal for considerably larger book funds will have very considerable importance for these fields.

In connection with the machine-produced serial record described above and with our proposed mechanization of the changing system in the new Undergraduate Library, we are faced with other new and unaccounted-for expenditures. Our previous budgets have not envisioned the sizeable cost of automation in the Library; yet, we are compelled by the volume of our transactions to conduct continually growing experimentation in this field and to discover the means of coping with expansion of the Library's services. While we have with considerable difficulty absorbed the cost of our experimentation to date, this cannot continue. It is our hope that either by general funding for administrative costs for the whole University or by specific assignment of funds to support new mechanized systems, the Library may be permitted not only to continue experiments in hand but to add new ones as the possibilities arise.

Briefly, it should be said that the Library staff has performed miracles in effectively meeting the exponential expansion of the workload our increased numbers create. I could not close this annual report without expressing my own great appreciation for their courage and endurance and to thank them for their devotion to the work of the Library.

NOTABLE ACQUISITIONS

OF

THE YEAR

AND

THE YEAR'S DONORS

## NOTABLE ACQUISITIONS

During the year 1967-68, the library's book and periodical collections have continued to grow vigorously in virtually all subject areas represented as active academic interests at the University. The following titles are only representative of the numerous items recommended by the Faculty and approved by the Research Fund Committee. They are arranged in general subject area order.

### ANTHROPOLOGY

- ACTA ETHNOGRAPHICA. Budapest, 1950-1961. v. 1-10.  
ARCHIVES SUISSES D'ANTHROPOLOGIE GENERALE. Geneva, 1914-1962. v. 1-26.

# ANNUAL REPORT OF THE UNIVERSITY LIBRARY FOR THE FISCAL YEAR 1968-69

October 1, 1969

*To the Chancellor of the University:*

I herewith submit the annual report for the University's libraries for the year 1968-69. There has been a very considerable change in the development of the library over the past year due, in large measure, to improved physical facilities and experimentation in various channels designed to enable us to meet the ever-increasing volume of service required and materials handled. The progress we have made is encouraging. The number and volume of demands yet unfulfilled could be discouraging. The Library staff continues to do its best to cope with these and deserves the highest praise for its efforts. The record which follows is ample evidence of the devotion and solidity of the staff.

The key event of the year for us was occupancy of the new Undergraduate Library. Almost all of our plans for the ideal utilization of available library space were directly related to this. One fly in the ointment was a single contractor for a vital item of supply, library bookshelves. Months behind schedule and absolutely unprincipled in business ethics, this contractor caused serious disruption in our planning for an orderly, well-organized change-over, not only in the Undergraduate Library space but in the Wilson Library as well. We were three months over our use schedule in the former and even now nine months over our planning for Wilson. A second, also serious complication, was an unforeseen delay in the projected relocation of the Library School and the indefinite postponement of space availability on the upper floor of Wilson. It is now anticipated that this space may possibly be cleared by the summer of 1970. Needless to say, these two complications have imposed upon us some anguished decisions, not only upon us but also on students and faculty. There have been many good days and others not so good. Taken altogether, the year has been one of strong and healthy progress, though not as great as our plans projected.

We did move into the new Undergraduate Library in the week of October 28 and opened for full use with all book collections and services in place on October 31. With very few minor exceptions, the new library has served admirably the functions for which it was planned. Within the first few months, the level of use moved up to five to six thousand students a day entering the building. Use of the Reserve reading collections reached a volume never before approached, running to over 3,000 issues per week. As the students adopted the new facility, their obvious satisfaction with the quality and extent of available good working space was evident throughout the structure. At this time, after full use for nearly all of the school year, we are certain that its planning is sound and its acceptance complete. A few minor

## UNIVERSITY OF NORTH CAROLINA LIBRARY

adjustments must still be made, but they will not be too difficult. The air conditioning system is not yet properly balanced, and one reading room will have some redesign of illumination. There are engineering problems now in process of resolution.

Revision of space use in the Wilson Library did not proceed either as smoothly or as rapidly as did the Undergraduate Library. However, the end of the year finds us with most of the relocations in place, if not completely established. The public catalog, circulation department, acquisitions and cataloging operations have all been moved to the first floor main entrance level. By closing off the side entrances to the library, we have been able to establish single exit control, thus enabling the possibility of open access throughout the building. A new entrance to the central book stack at the main floor level, just opposite from the catalog, provides a natural flow from the card catalog to the book shelves. At the other side of the bookstack, a new exit leads directly to the circulation department for record-making, or alternately to the controlled exit for those who are not charging out books.

The revision of space use on the second floor of Wilson was designed to convert that entire level to a combined reading, reference and research area. The delivery lobby, which formerly served as the circulation area, was converted to the housing and service of secondary indexing and bibliographic services. Periodical indexes, newspaper indexes, various subject-oriented indexing and abstracting services, and the major national bibliographic tools are located in this area. Appropriate seating and study tables immediately adjacent should facilitate and promote their use.

The space formerly occupied by the Acquisitions and Cataloging departments was reorganized as a new Periodicals Department, designed to bring into one easily accessible and attractive study area all of the current periodicals of the Humanities and Social Sciences and a large number of complete files of heavily used journals. The initial selection of complete files was determined by personnel of the subject divisions; changes will be made as experience provides added guidance. It was necessary also to make a selection out of the 5,000 plus journals currently received since it is patently impossible to display all of these within one room. Those not in the room, however, are on shelves immediately adjacent and readily accessible. Again, relocation may be made to modify this initial selection as experience dictates. This new study area is fully staffed and will, we believe, provide for infinitely improved availability of our growing resources of journal literature.

Relieved of space and service demands for journals and their indexes, each of the Divisional reading areas, Humanities and Business Administration and Social Sciences, have revised and relocated their respective reference and working collections.

## UNIVERSITY OF NORTH CAROLINA LIBRARY

Some physical requirements remain to be supplied but the beginning of the school year in September of 1969 should see all change on this level completed. Early observation and experience to this time augurs well for their use.

As indicated above, our proposed planning for the space to have been released by the removal of the Library School was suspended by the unavailability of other space destined for the Library School. We have developed general plans for converting the entire upper level to expanded graduate student, research, bibliographical and faculty study services. We have an urgent need for increased faculty studies, seminar spaces, and physical facilities for our expanding corps of bibliographers, as well as the Area Studies programs. We can face with relative equanimity the assurance of accomplishing these plans perhaps a year hence, but we are much less sanguine concerning our future accommodations of graduate student needs.

In last year's annual report we attempted to establish the critical nature of the physical problems inherent in serving a rapidly increasing graduate student body within a fixed size physical facility. The new seating available for typical undergraduate use is an enormous improvement over our previous capability in that area, but the relocation of their use in no sense increases the availability of the kind of research individual study spaces needed for the typical graduate student. Since 1952 these students have had some 486 study carrels available to them. In 1952 there were 713 graduate students in the University. At the latest count this university had 4,173 graduate students, of whom 3,433 were in fields of study served by Wilson Library. Projections to oncoming years forecast only further aggravation of an already intolerable inadequacy. Our proposal for an addition to the Wilson Library envisioned from 800 to 1,000 additional research carrels and the possible inclusion of 100 additional faculty studies. Should this addition not be funded very soon we can anticipate serious questions concerning our capacity to serve an ever-increasing graduate student body and faculty. To balance this pessimistic note with one more cheerful, let me here state my own conviction that it was only the excellent provision of library facilities and resources for the mass of undergraduates which spared the library from becoming one of the focal points of antagonism and a target of the general student unrest prevalent on our campus, and across the country.

The unrest of the academic community as a national and local phenomenon has not entirely spared our library. Reflections of it have surfaced as both general and specific complaints from graduate students and faculty members. We judge these to be genuine expressions of constructive concern and we are determined to find the best possible solutions for our problems. For the most part, these derive from inescapable facts of size. We cannot serve 16,000 students and 1,100 members of the faculty in the

## UNIVERSITY OF NORTH CAROLINA LIBRARY

same manner or with all the same facilities as we served 10,000 and 800 six years ago, or 6,000 and 600 twelve years ago. We cannot even buy the same number of books or subscribe to more journals, since the increased price of these commodities has kept all-too constant pace with our gradual increases in funds for this purpose. And most unhappily for us, we have the uneasy feeling that our own constituency, the students, graduate students and faculty now blame the library for creating problems which they themselves make. It is said there are not enough copies of many books. It is also said there is not enough money for all the different books we need. Obviously, we cannot have both, even to the extent our funding permits. It is said that borrowing privileges are too restrictive and faculty borrowing must remain privileged. Again, you cannot have it both ways. Some individual privilege will have to be sacrificed for the general benefit. Without this there can be no change other than panic. Many accepted practices of the typical small university library of twenty years ago are now hopelessly anachronistic and in fact untenable as current practice. We have had to make many changes to enable our staff to keep up with its increased loads; some of these changes affect individual or special privileges and any loss of privilege is fiercely resented. Yet, in fact, it is not the Library or the librarians who create these problems; it is the doubling and redoubling of our students, our faculty, our volume and the complexity of our resources, our ever-broadening program of studies, in short, numbers. We have in microcosm in the library the same problems that the University administration has in macrocosm, all derived from these or other numbers. We must devise rational ways of dealing with them and we intend to bend our best efforts towards this end. We particularly seek the earnest consideration of your administration and the entire university community to the problems we must solve.

Our efforts to bridge the computer age gap have had some success, as witness the enthusiastic reception of our computer-assisted publication of the entire serial holdings of the University libraries. This book catalog now serves as a primary source in libraries throughout the state and in research libraries across the whole country. It is being used as a model for the production of similar lists by other major libraries of the state, and will undoubtedly constitute the foundation of all records of this state's resources. Our second venture in computer applications, the mechanized circulation system, will be operational in the Undergraduate Library by the end of the summer. As we learn how well it works and as its value is recognized in concrete (i.e. budget) terms, we will extend it to other libraries and other functions.

This year has seen rapid progress in extending our cooperative services to and from both private and public libraries of the state. A project funded by Title III of the Higher Education Act

## UNIVERSITY OF NORTH CAROLINA LIBRARY

through the State Library has enabled us to vastly improve our North Carolina Union Catalog, to extend its availability and to expand the Interlibrary Service Center. We now have a more versatile TWX installation and the State Library serves for direct telephone interchange with all academic institutions in North Carolina. These functions are now fully staffed and functionally grouped for better service.

This has been a particularly good year for collection building. The continued availability of NDEA funds and a larger grant of federal funds for our Latin-American program will push our book expenditures to the highest level yet attained in our library. Currently proposed reductions in federal funds for such purposes will make it all the more urgent that the State take a stronger hand in building up its greatest bibliographical resource in this institution. Ours is the only public institution in this state having a nationally ranked academic library. Short of twenty years of concentrated effort and some twenty million dollars in funds, this resource could not be equalled, much less surpassed. It is in the best interest of the State of North Carolina to concentrate its library resources where the strength already provides a solid base. Our institution should restate this purpose as its own on every appropriate occasion. We are probing every other possible avenue which may lead to improved funds for library resources, but the prospects are not too bright.

Physical changes in the Library have also required some personnel adjustments, but in general the personnel situation in the library has been notably stable on the professional level. Among sub-professional and clerical force there is almost continual change, since most of these are students and student wives or husbands. Their mobility is a natural concomitant of their age; we are happy to have their bright, usually industrious contributions to our labors. We will lose one of our principal staff in June, when Mr. Ashby Fristoe, Chief of Technical Processing, leaves to join the staff of the University of Hawaii University Library. He will have then given five years of dedicated service, and he leaves an indelible mark on our systems in two divisions of the Library, Acquisitions and Cataloging. He richly merits our best wishes for his future success. Eight years of progressively responsible work by Mr. Charles Schliecker, and the needs of our growing fiscal and personnel tasks have earned him a new administrative title, Assistant University Librarian for Management. Mr. Schliecker has won the sincere appreciation and respect of all who work with him in his broad responsibility for all fiscal matters, including trust funds, all physical plant, and personnel functions other than academic staff. The establishment of the new Periodicals Department required a new Chief. We have promoted Miss Marcia Tuttle, former Head of the Interlibrary Loan Service to this new task. She will build up a supporting staff and have the initial responsibility for developing the important ser-

## UNIVERSITY OF NORTH CAROLINA LIBRARY

vices we anticipate in this area. In other, more modest assignments, we have made some gains and suffered some losses, but on the whole, we appear to have reached a plateau of stability in our professional staff that speaks well for our library and our institution.

This has been an extraordinarily good year for the record of professional contributions by members of the Library staff. Four members of the staff have published books this year; namely, Clifton Brock, Isaac Copeland, James Pruett and William Powell. There have been a score of solid contributions in the form of articles in professional journals. Recent additions to the staff promise far greater professional production of this kind in forthcoming years. It has long been a matter of some regret that more members of the staff do not participate in professional association work and publication. We expect these numbers to increase and to make the Library staff a far more vital force in brightening the professional image of the University.

In a year when our University, like many others, has been raked by the plague of student unrest, the Library has been relatively calm, though bedeviled by physical change. In a wry manner, I suppose we have been blessed by the attention turned to other directions which left our travail mostly in our hands. Whatever the sources of our relative peace, we are grateful for it and for the forbearance of all those who have patiently borne the trials imposed by the massive changes in library operations over the past year. We are also deeply appreciative of your own concern for the well-being of the Library throughout the year and for the many wise contributions of your administrative staff to the resolution of our problems.

My own thanks go to all members of the Library staff, who have striven to keep us in good order despite frequently disorderly surroundings. They have all now earned their graduation from the T.G.I.F. club (Thank God it's Friday) and approved acceptance into the T.G.I.J. club (Thank God it's June, the end of the school and fiscal year). With the awarding of these great distinctions and by the authority vested in me by no one, I declare us all members of the same society, dedicated to making ours the most serviceable academic library anywhere, the operating center of the University to which we are all devoted.

JERROLD ORNE, *University Librarian*

NOTABLE ACQUISITIONS  
OF  
THE YEAR  
AND  
THE YEAR'S DONORS

## NOTABLE ACQUISITIONS

During the year 1968-69, the library's book and periodical collections have continued to grow vigorously in virtually all subject areas represented as active academic interests at the University. The following titles are only representative of the numerous items recommended by the Faculty and approved by the Research Fund Committee. They are arranged in general subject area order.

### ART

Koechlin, Raymond. *LES IVOIRES GOTHIQUES FRANÇAIS*. Paris, 1924. 3 vols. (1968 reprint).

### BOTANY

THE HISTORICAL HERBARIA OF PARIS, comprising the collections of Desfontaines, Humbolt-Bonpland-Kunth, Jussieu, Lamark, Loureiro, Michaux, Rousseau-Aublet, Tournefort. Microfiche edition. Zug. 1969.

Troll, Wilhelm. *VERGLEICHENDE MORPHOLOGIE DER HOHEREN PFLANZEN*. Königstein, 1968. 3 vols. & suppl. (reprint).

### CHEMISTRY

American Chemical Society, *CHEMICAL ABSTRACTS, DECENNIAL INDEX*. 7th. *27-YEAR FORMULA INDEX, 10-YEAR PARENT INDEX*. Washington, 1969.

### CLASSICS

*CORPUS INSCRIPTIONUM ETRUSCARUM*. Leipzig, 1893-1902. 2 vols. & suppl. (reprint).

### FAR EASTERN STUDIES

CH'IN-TING PA-CH'I T'UNG-CHIH. (Imperially directed revision of the General History of the Manchu Banner System). Peking, 1799. 60 vols. (1968 reprint).

WAN KUO KUNG PAO. (The Chinese Globe Magazine). Shanghai, 1889-1929. 40 vols. (1968 reprint).

### GERMANIC LANGUAGES AND LITERATURES

GERMAN BAROQUE LITERATURE COLLECTION AT YALE UNIVERSITY. (Microfilm. Joint acquisition project with Duke University Library).

### HISTORY

Abramsky, Chimen, ed. *RADICAL PERIODICALS OF GREAT BRITAIN*. (Reprint of 17 periodicals published originally between 1794 and 1867). New York, 1968.

Caetani, Leone. *ANNALI DELL'ISLAM*. Milano, 1905-1926. 10 vols. (reprint).

Egypt. *JOURNAL OFFICIEL DU GOUVERNEMENT EGYPTIEN*. Cairo, 1922-1938. (microfilm).

Great Britain. Foreign Office, *INDEX TO BRITISH FOREIGN OFFICE CORRESPONDENCE 1929-1938*. Liechtenstein, 1969. 77 vols.

KRASNAIA ZVEZDA. Moscow, 1941-1952. (microfilm).

LETOPIS' REVOLIUTSII. Moscow, 1922-1938. (microfilm).

at-Tabari, Abu Ja'far Muhammad ibn Jarir. *ANNALES (TA'RIKH ALRUSUL WA AL-MULUK)*. (ed. M. J. Gorje) Leiden, 1892-1898. 16 vols. (reprint).

## UNIVERSITY OF NORTH CAROLINA LIBRARY

PECHAT' I REVOLIUTSIIA. Moscow. 1920-1930. (reprint).

REVUE BELGE DE NUMISMATIQUE ET DE SIGILLOGRAPHIE.  
Brussels, 1842-1961. (reprint).

SCHWEIZERISCHE NUMISMATISCHE RUNDSCHAU. Bern, 1891-1961. Vols. 1-41.

SEVERNAIA PCHELA. St. Petersburg, 1825-1863. (microfiche).

### LINGUISTICS

Guthrie, Malcolm. COMPARATIVE BANTU. Farnborough, 1968.  
4 vols.

### MUSIC

DEUTSCHES MUSIKGESCHICHTLICHES ARCHIV KASSEL.  
Microfilm collection (in part).

REVUE DES MAITRISES POUR AIDER A LA RESTAURATION DE  
LA MUSIQUE SACREE D'APRES LES PRINCIPES DU MOTO  
PROPRIO. Nantes. 1920-1926. (reprint).

REVUE PLEYEL. Paris, 1923-1927. 16 vols. (reprint).

### POLITICAL SCIENCE

NUESTRA INDUSTRIA and VERDE OLIVO. Cuban journals of the  
1960's on microfilm.

### RELIGION

Society of Oriental Research. JOURNAL. Chicago. 1917-1932. Vols.  
1-16. (reprint).

### ROMANCE LANGUAGES AND LITERATURES

LE NOUVELLISTE DU PARNASSE. Paris, 1730-1732. 3 vols. (Followed by OBSERVATIONS SUR LES ECRITS MODERNES. Paris, 1735-43. 34 vols. and JUGEMENTS SUR QUELQUES OUVRAGES MODERNES. Paris, 1744-45. 11 vols.) Pierre-François Guyot Desfontaines, ed. (reprint).

### SLAVIC LANGUAGES AND LITERATURES

Mel'nikov, Pavel Ivanovich. POLNOE SOBRANIE SOCHINENII. St. Petersburg, 1825-1863. 14 vols. (microfiche).
